ProjectReady®

Use Case

ProjectReady Use Case for Construction Management & Manufacturing

Problem

- A Construction Management subsidiary of major manufacturer that needed to collaborate, disseminate content such as transmittals, RFI's and change orders; and manage tasks and time across 400+ vendors & consultants
- Required cloud based low cost infrastructure
- No IT Support from parent organization

Solution

- Use ProjectReady to manage 300+ concurrent projects & 3,300+ document control package
- Unify content in SharePoint, critical line of business systems
- Provide time entry for staff and vendors
- Achieve real time reporting through out

Why They Chose ProjectReady vs. Competition

- Fully Cloud based solution
- "Self-Service" empowerment of business users
- Time entry & task management in single user experience
- Seamless integration across business systems
- Secure internal & external collaboration
- Rapid creation & distribution of transmittals & RFI's across project participants

About ProjectReady

ProjectReady is a Modern, End-to-End Project Management & Document Control solution empowering you to Simplify, Unify & Collaborate Across Projects & Content.

ROI

- Reduction of 2,200+ hours in time savings estimates to savings of $118,000+ Annually
- Real Time Reporting
- Elimination of IT administrative costs around security and site provisioning
- Elimination of sunk costs such as: FTP, Dropbox, etc.
