

ProjectReady® Punch Lists

Empower Your Mobile Workforce

As the construction phase winds down a punch list is essential to make sure what was built is to specification and the client approves. From the Desktop to Mobile in the field, ProjectReady's Punch List lets you create and govern the items that need to be inspected and approved.

- Create master lists of standard punch list items
- Create and store templates
- Build and add on the fly items for the project
- Assign each item to the correct reviewer
- Walk-thru in the field with offline functionality
- Take and upload photos
- Add comments
- Preview and generate final reports
- Export as PDF
- Send for Approval with the ProjectReady Document Control suite

Simplify, Unify & Collaborate Across Your Projects with ProjectReady
