

ProjectReady® for the IT Pro

Unlock the value of your enterprise
and drive ROI with ProjectReady

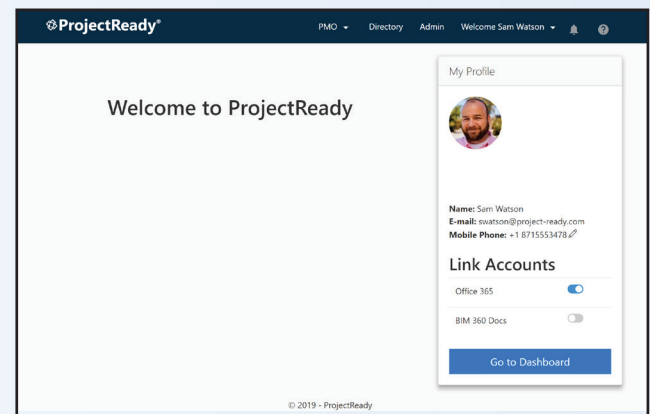

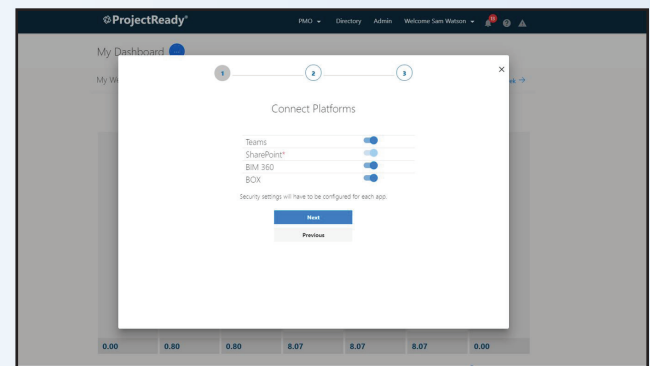

IT Professionals make critical decisions every day and increasingly are asked to do more with less. With the constant demand of the business to adopt an ever-increasing array of solutions to address their needs - driving ROI, containing costs, and the overhead of administration, is a never-ending challenge.

With ProjectReady, remove routine administrative overhead and unify systems to lower costs and drive ROI. Automate and deliver more value from what you already own and drive process over platform, to deliver that value to the business.

You Made the Right Choices ProjectReady Drives that Value to the Business

- Automate the provisioning and creation of workspaces in SharePoint, Microsoft Teams, Autodesk BIM 360 & Box
- Easily set and maintain security and permissions inside and outside the organization
- Eliminate the constant administrative overhead of creating & managing project sites
- Set your governance and taxonomy once with ProjectReady
- Empower your end-users
- Control your data through process

Simplify, Unify & Collaborate Across Your Projects with ProjectReady
