ProjectReady®

PRESS RELEASE
FOR IMMEDIATE RELEASE:

Autodesk BIM 360 Integration with SharePoint for Document Control, Tracking & Distribution
Connect BIM 360, SharePoint, Office 365 & File Folders with ProjectReady Central

NEW YORK, NY – September 8th, 2017 - ProjectReady™, a leading project management and document control solution announced the release of the **ProjectReady BIM 360 Connector**.

The ProjectReady BIM 360 Connector is an add-on solution that connects BIM 360 content, inclusive of Autodesk and Revit files, directly with ProjectReady Central for use in the Creation & Management of Transmittals, RFI's, Submittals and Change Orders with SharePoint, Office 365 and File Folders.

For customers who work with Autodesk content and BIM 360, such as those in Facilities Management and the AEC (Architecture, Engineering, Construction) industries, the solution delivers great value and ease of use. Now you can keep and manage your content where it belongs and deliver seamless access to it connecting the content you need for Document Control across the enterprise. and eliminating the issue of siloed data and the need to run multiple applications to deliver your content.

Connecting your BIM 360 content with ProjectReady Central for Document Control & Distribution Allows you to:

- Seamlessly **Access**, **Filter** & **Leverage** all your BIM 360 content
  (including **AutoCAD** & **Revit** Files)

- Connect content from **BIM 360**, **SharePoint**, **Office 365** & **File Folders** into any document control package (Transmittal, RFI, Submittal and Change Order)

- Access content from all your BIM 360 **Projects**, **Accounts**, **Folders** & **Sub-Folders**

- See a **preview** of your **documents** and **drawings** directly from ProjectReady before adding to your document control package

- Automated **Cover Sheets** and **built-in workflows** ensure controlled, secure delivery of your content, internal & external of the organization.

- **Reporting** and **Tracking** of your distributed BIM 360 content

ProjectReady Founder and CEO Joseph Giegerich stated, "The Launch of the ProjectReady BIM 360 Connector is an exciting release for our customers and a huge step forward in delivering ProjectReady's goal of unifying project information regardless of where it resides, ending content chaos. Connecting content in SharePoint and BIM 360 with the modern user experience delivered with ProjectReady extends the value and capabilities of our document control solution to our customers. "

Based in New York with clients focused in the AEC (Architecture, Engineering, Construction), Legal and Professional Services arena across the globe, ProjectReady and its parent company Gig Werks have been providing collaboration and document management solutions and services since 2004 that leverage the Microsoft technology stack and SharePoint.
