ProjectReady®

Project Control with ProjectReady

From RFP to Project Completion

The Webcast Will Begin Shortly at 1:00pm EST

Agenda

ProjectReady®

- What is ProjectReady?
- What is Project Control & Why is it Important?
- Project Control Demonstration
  - Building Your Project with ProjectReady
  - Setting Up Baseline Deliverables & Tasks
  - Forecasting Utilization & Revenue
  - Automating Budget and Estimate Creation
  - Managing Change Orders
- Questions & Answers
  - If you have questions during the presentation, please type them into the GoToWebinar Control Panel and we will answer during Q&A

ProjectReady - Digitally Transforming Projects

ProjectReady®

Process over Platform – ProjectReady delivers Process as a Service providing End-to-End Project Management & Document Control Across Your Projects and Content

Priced and Designed to Scale

Collaboration through Connection

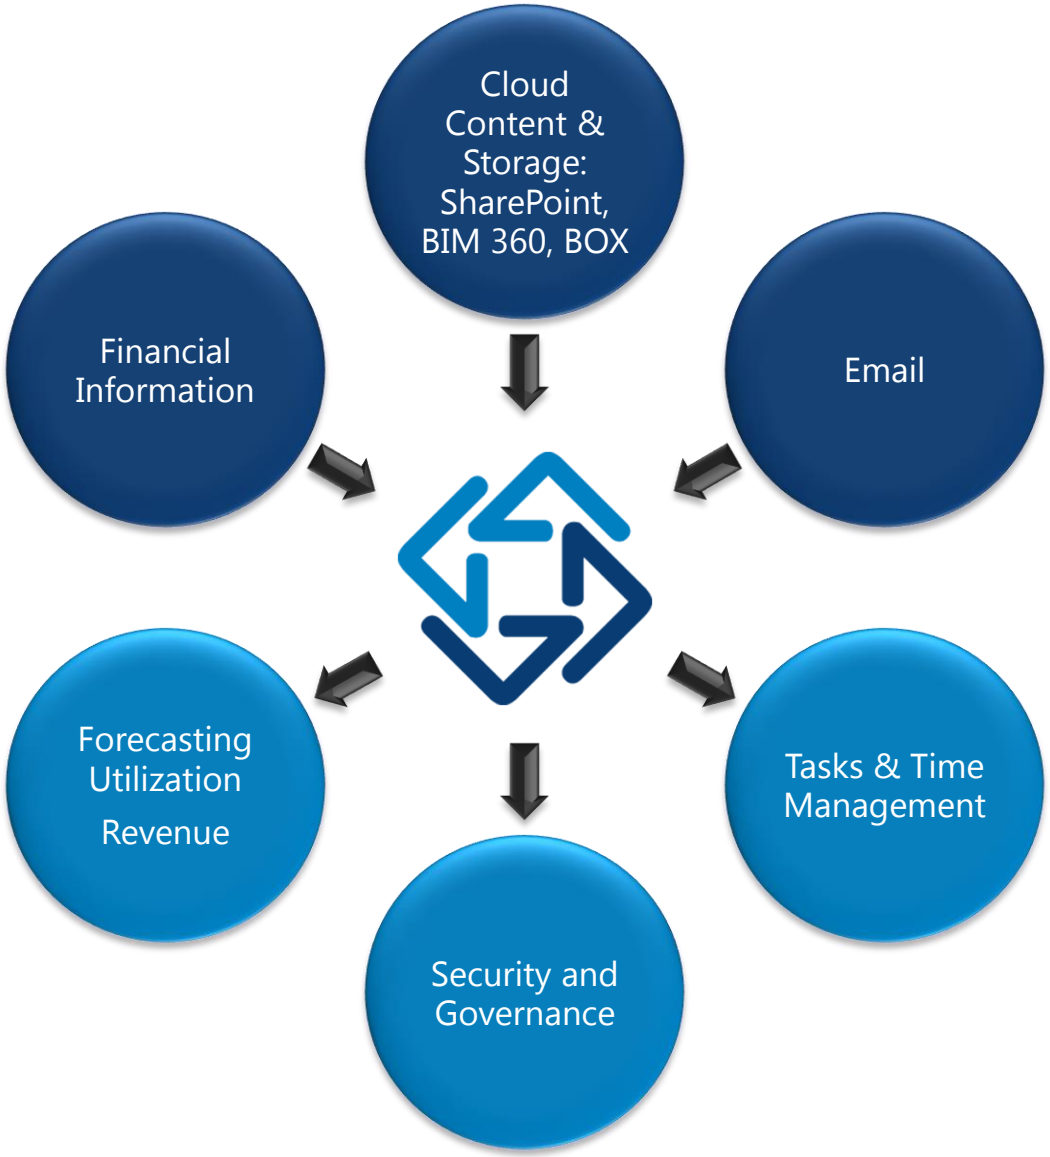
Driving Return on Investment

ProjectReady®

Simplify, Unify & Collaborate Across Your Projects

ProjectReady - Connected Process

ProjectReady®

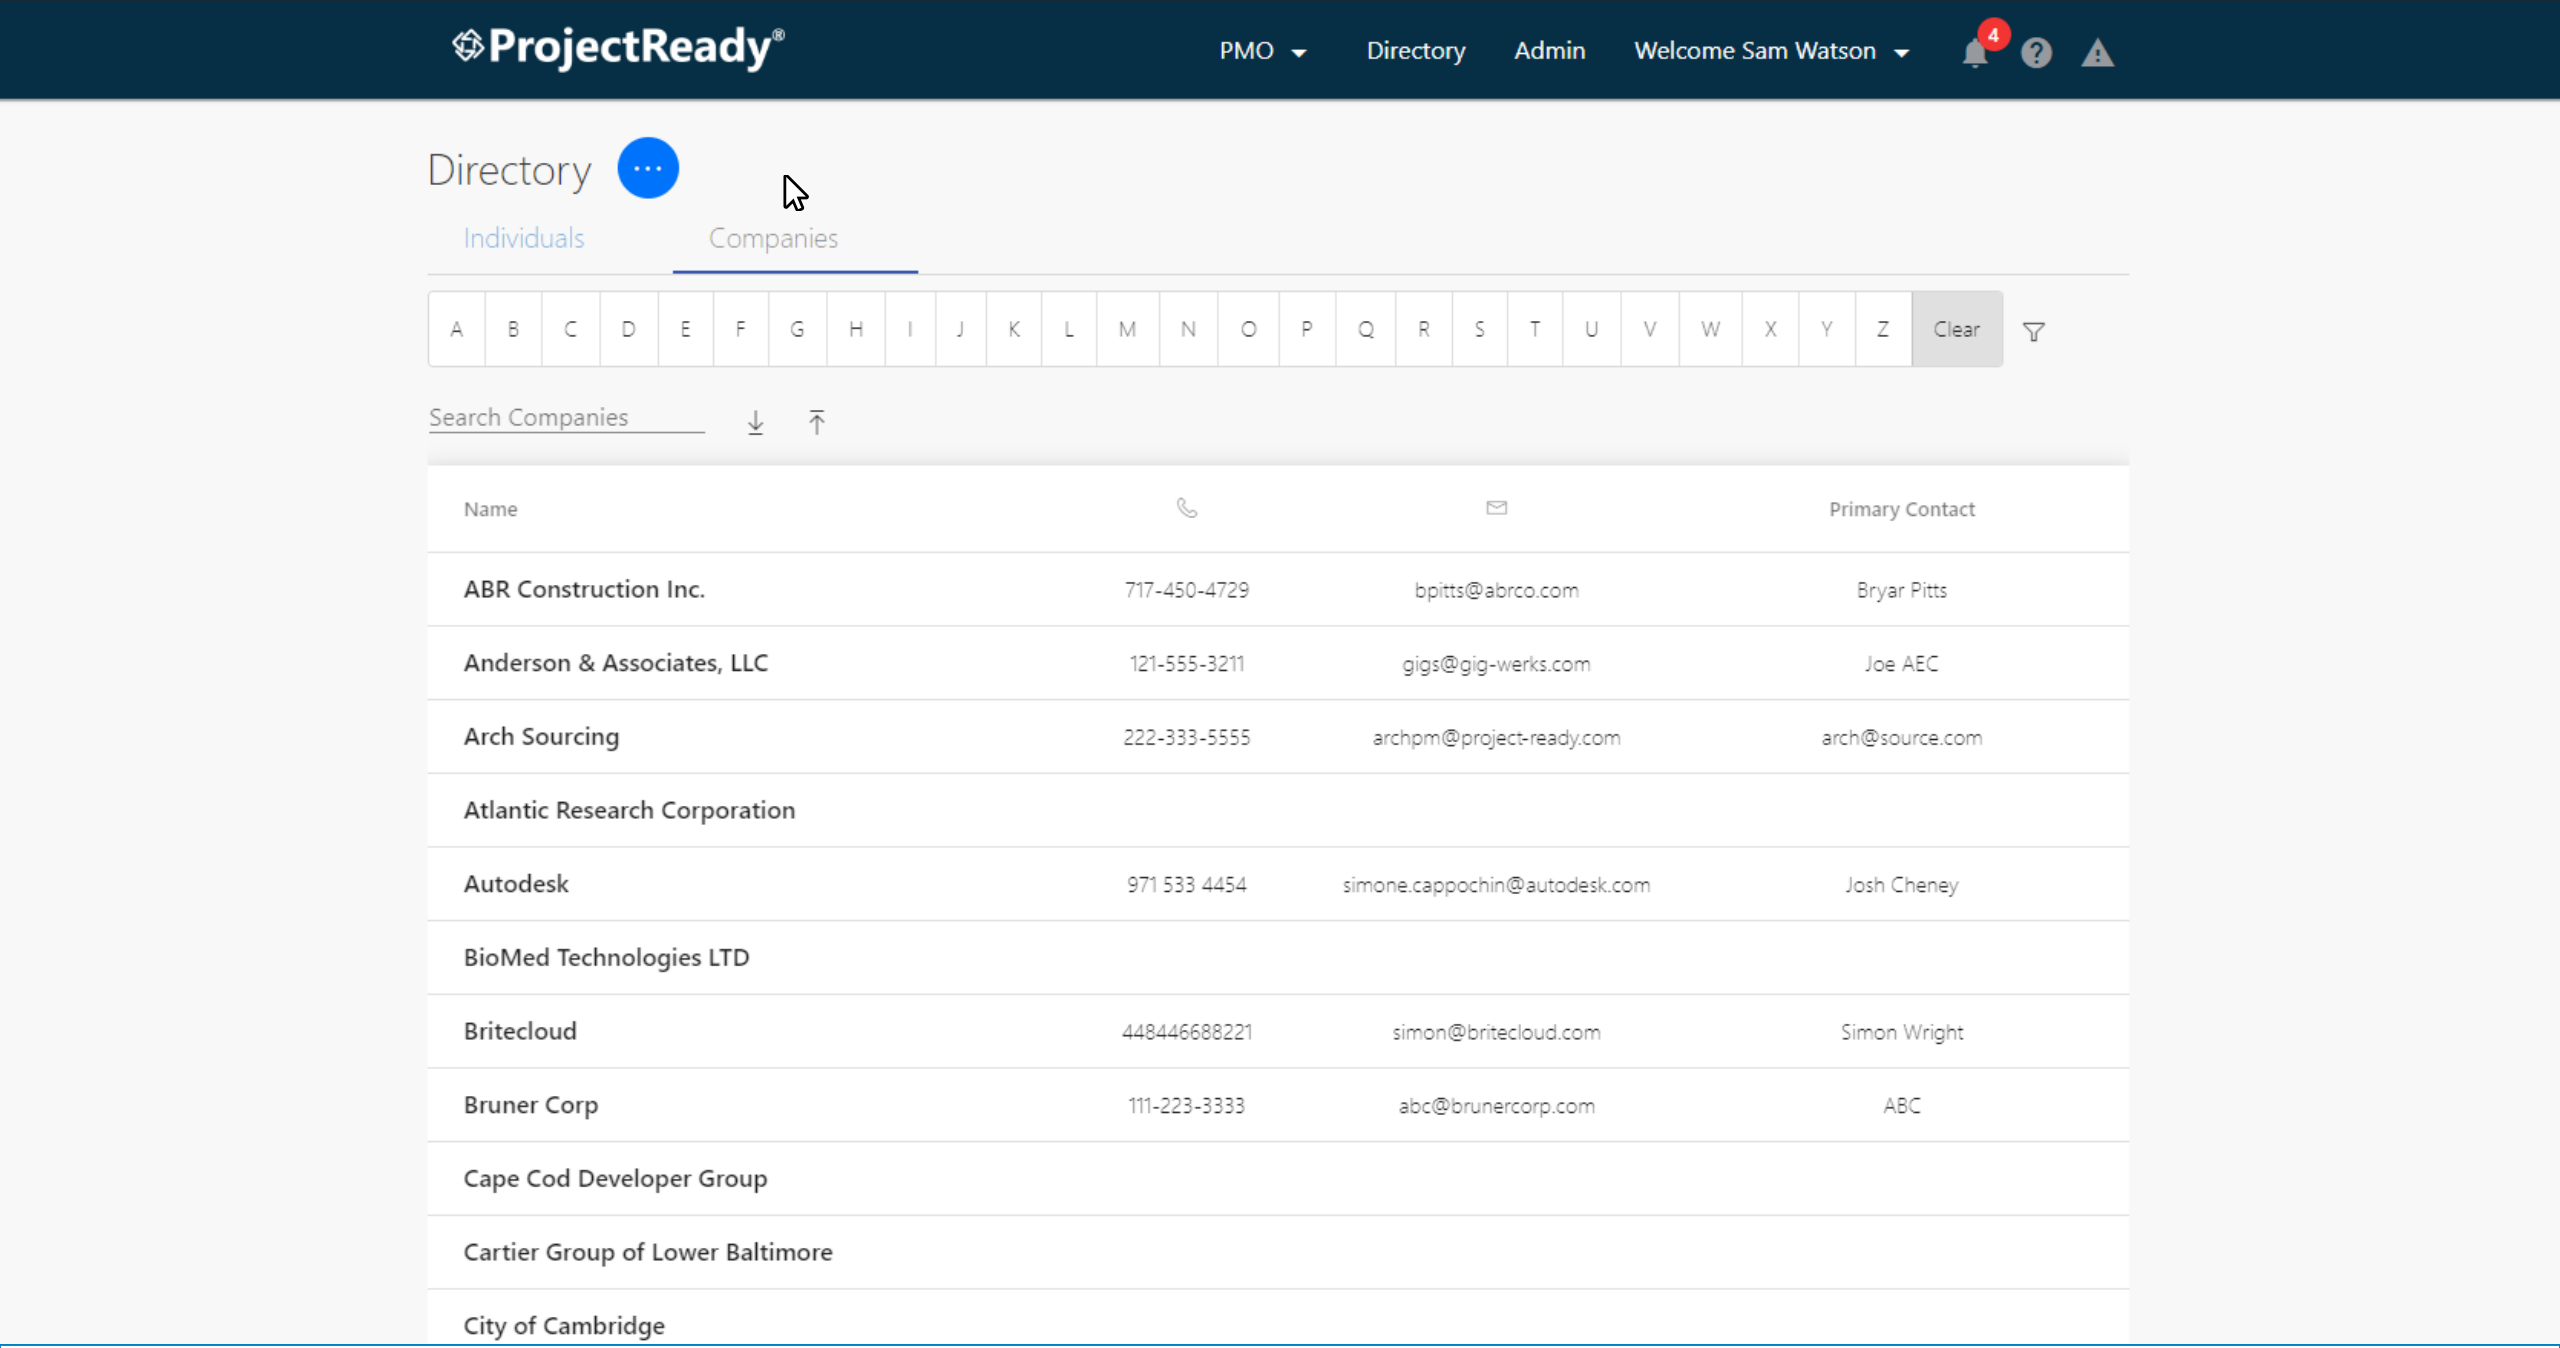


What is a Project

ProjectReady®

A Team of People

- Its companies
- Working with Individuals
- Who have Roles
- And Rates
- That work on Projects of type



In ProjectReady your companies, individuals and roles are all setup in the Directory

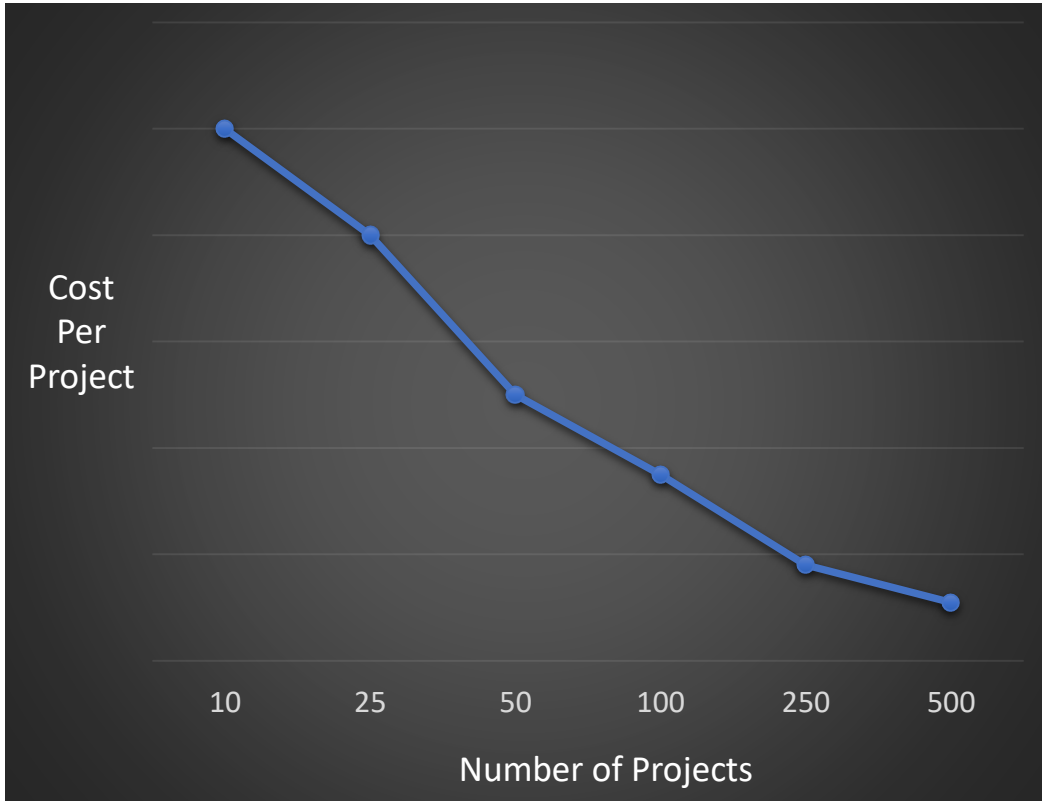
BLUEBEAM

A NEMETSCHEK COMPANY

The ROI of Collaboration Through Connection

ProjectReady®

- Driving efficiency through Collaboration through connection: all bound to a single project ID
- Elimination of the expense of routine tasks through the automation of the administration, creation & connection of workspaces
- Getting more value from what you already own unifying "Best of Breed" content management
  - 90% of organizations already own SharePoint
  - Autodesk BIM 360 Docs is a leading cloud Construction document management software
- Quick, easy and automated Document Control wherever content is being worked on and stored



We Don't Charge
for our Client's Success

With Features Built for the AEC

ProjectReady®

- Project & Task Management
- Document Control
- Provisioning
- Autodesk BIM 360 Integration
- Revenue & Utilization Management
- Security & Governance
- Punch Lists
- PMO

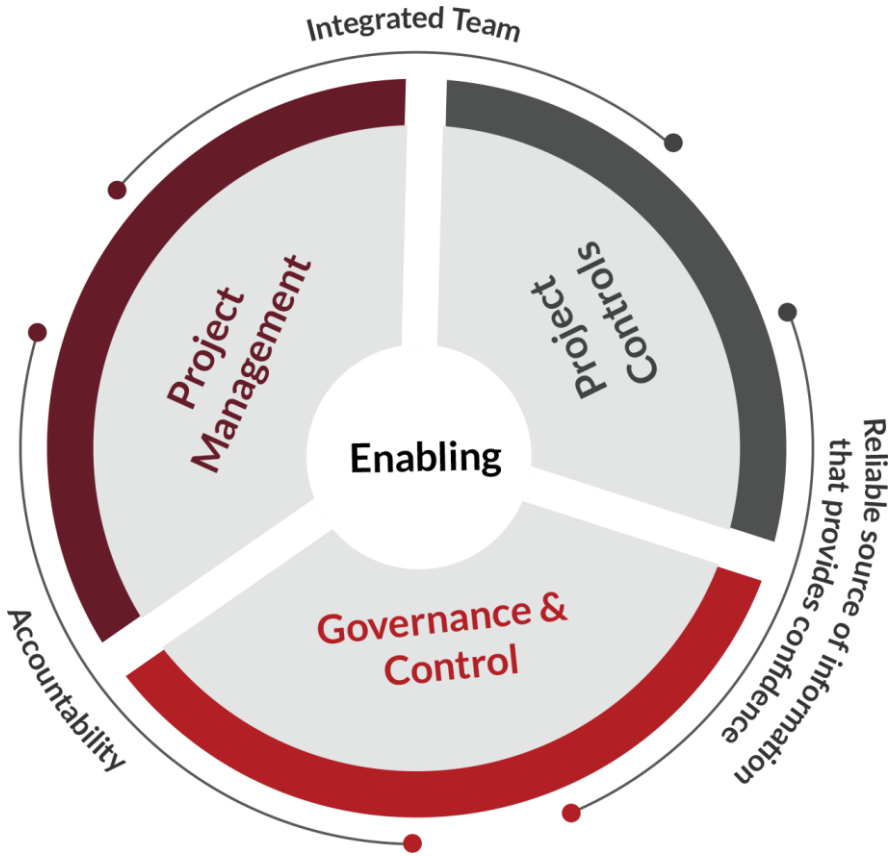
- As-Built Management
- Project Control

What is Project Control?

ProjectReady®

Project Controls are the data gathering, data management and analytical processes used to predict, understand and constructively influence the time and cost outcomes of a project; through the communication of information in formats that assist effective management and decision making.



* https://projectcontrolsonline.com/definition-and-importance-of-project-controls

Why is Project Control Important?

ProjectReady®

- Managing Cash Flow
- Forecasting & Utilization
- Change Order Management and Claim Management
- Timely Billing & Payment
- Good Project Control practices can reduce execution schedule slip by 15%

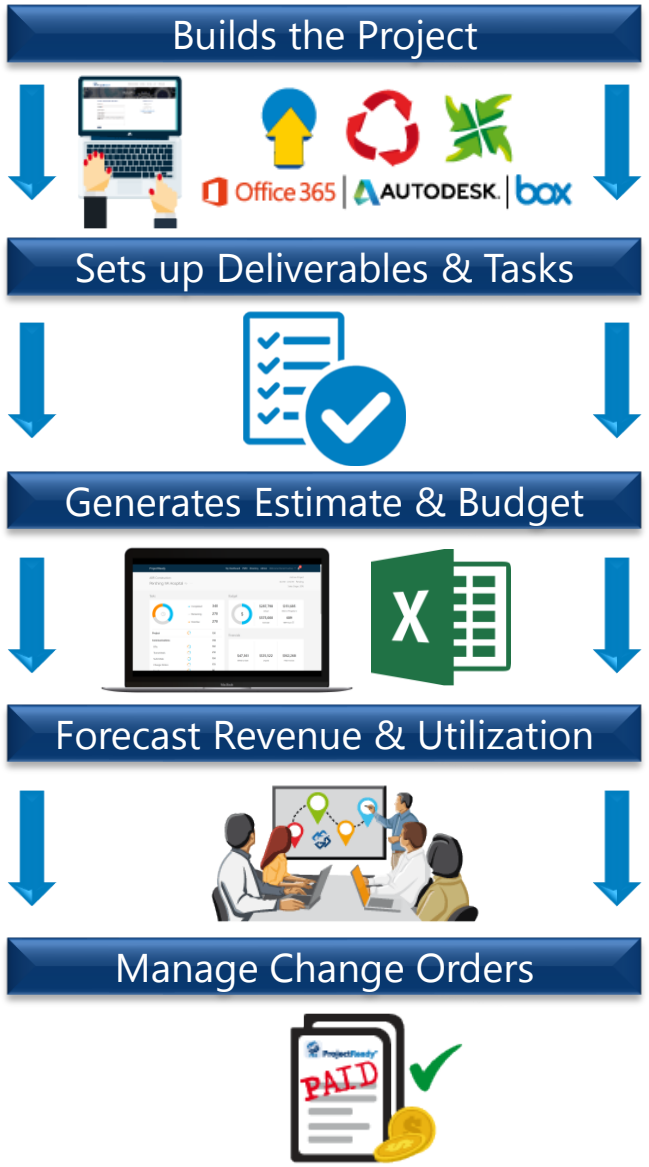
* https://www.constructiondive.com/news/how-to-keep-cash-flowing-from-one-project-to-the-next/550742/

* https://projectcontrolsonline.com/definition-and-importance-of-project-controls

Project Control Demonstration

ProjectReady®

- Sam's Company has a new RFP and needs to generate an estimate and proposal and forecast the cost of whether or not they have the resources to do the job
- Sam's company has a standard portfolio, so he uses a project template to produce these tasks and deliverables quickly in ProjectReady
- Using that template will provide a forecast of revenue and utilization
- Once that project is won, change orders can be managed and handled easily across the project's lifecycle



Project Control Demonstration

ProjectReady®

Builds the Project

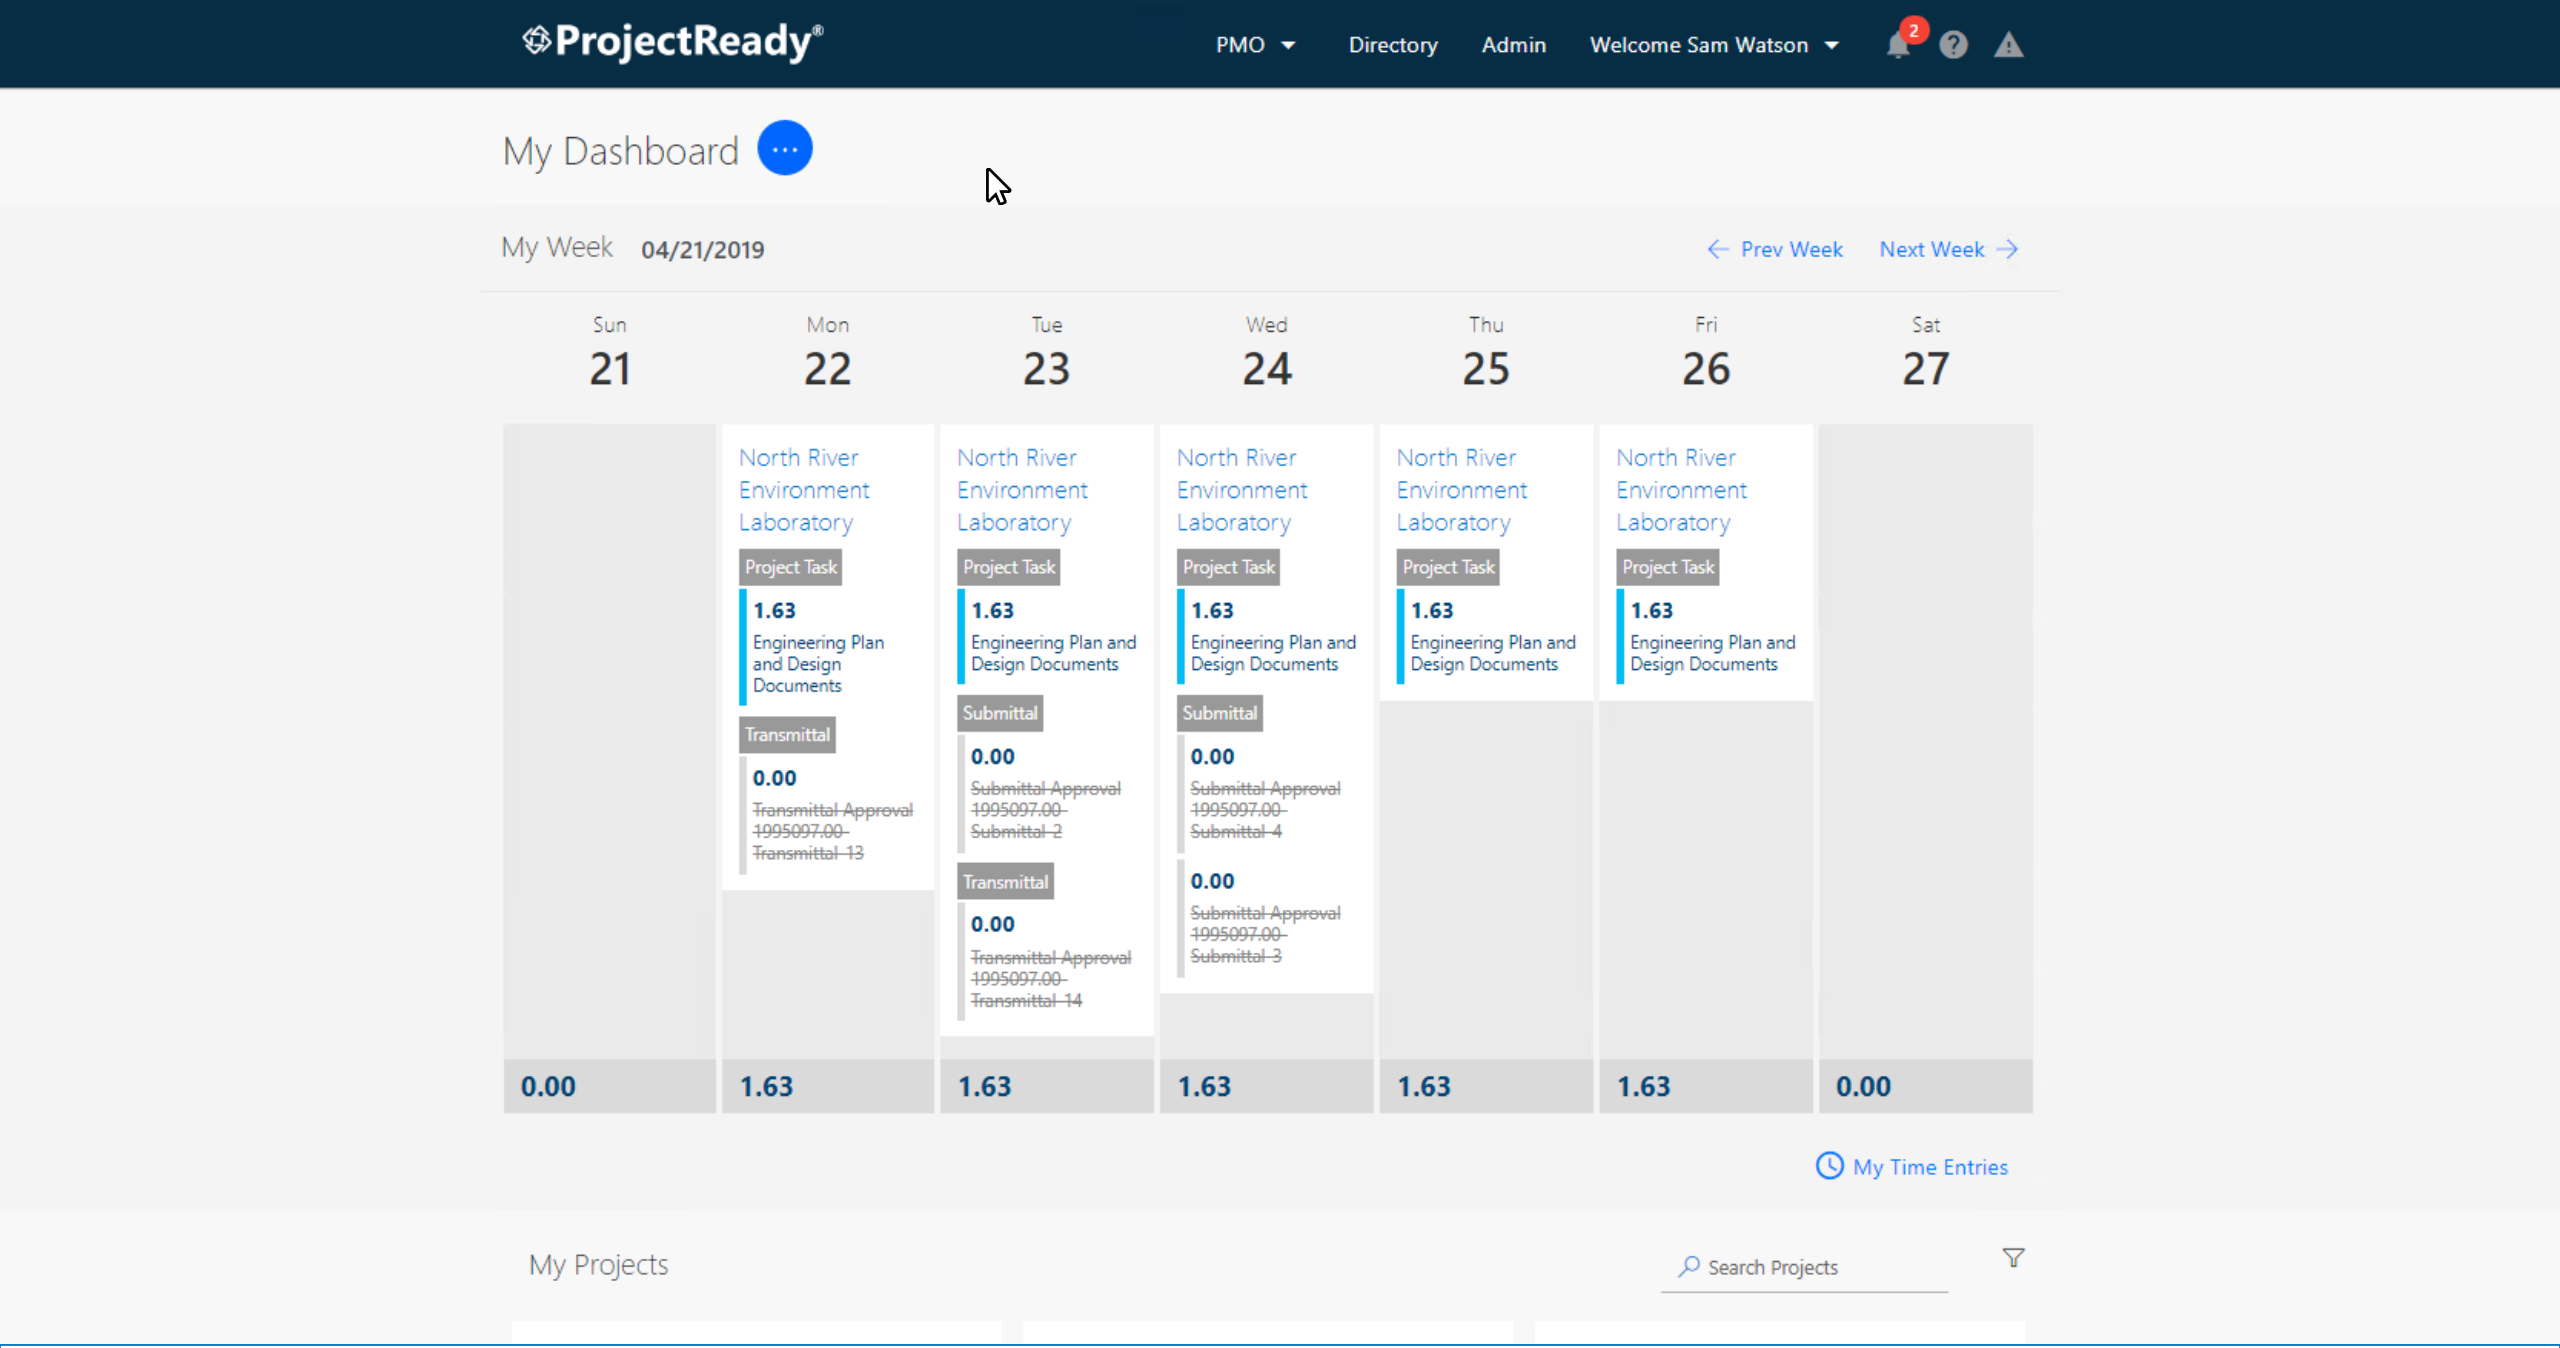
Sets Up Deliverables & Tasks

Generates Estimates & Budget

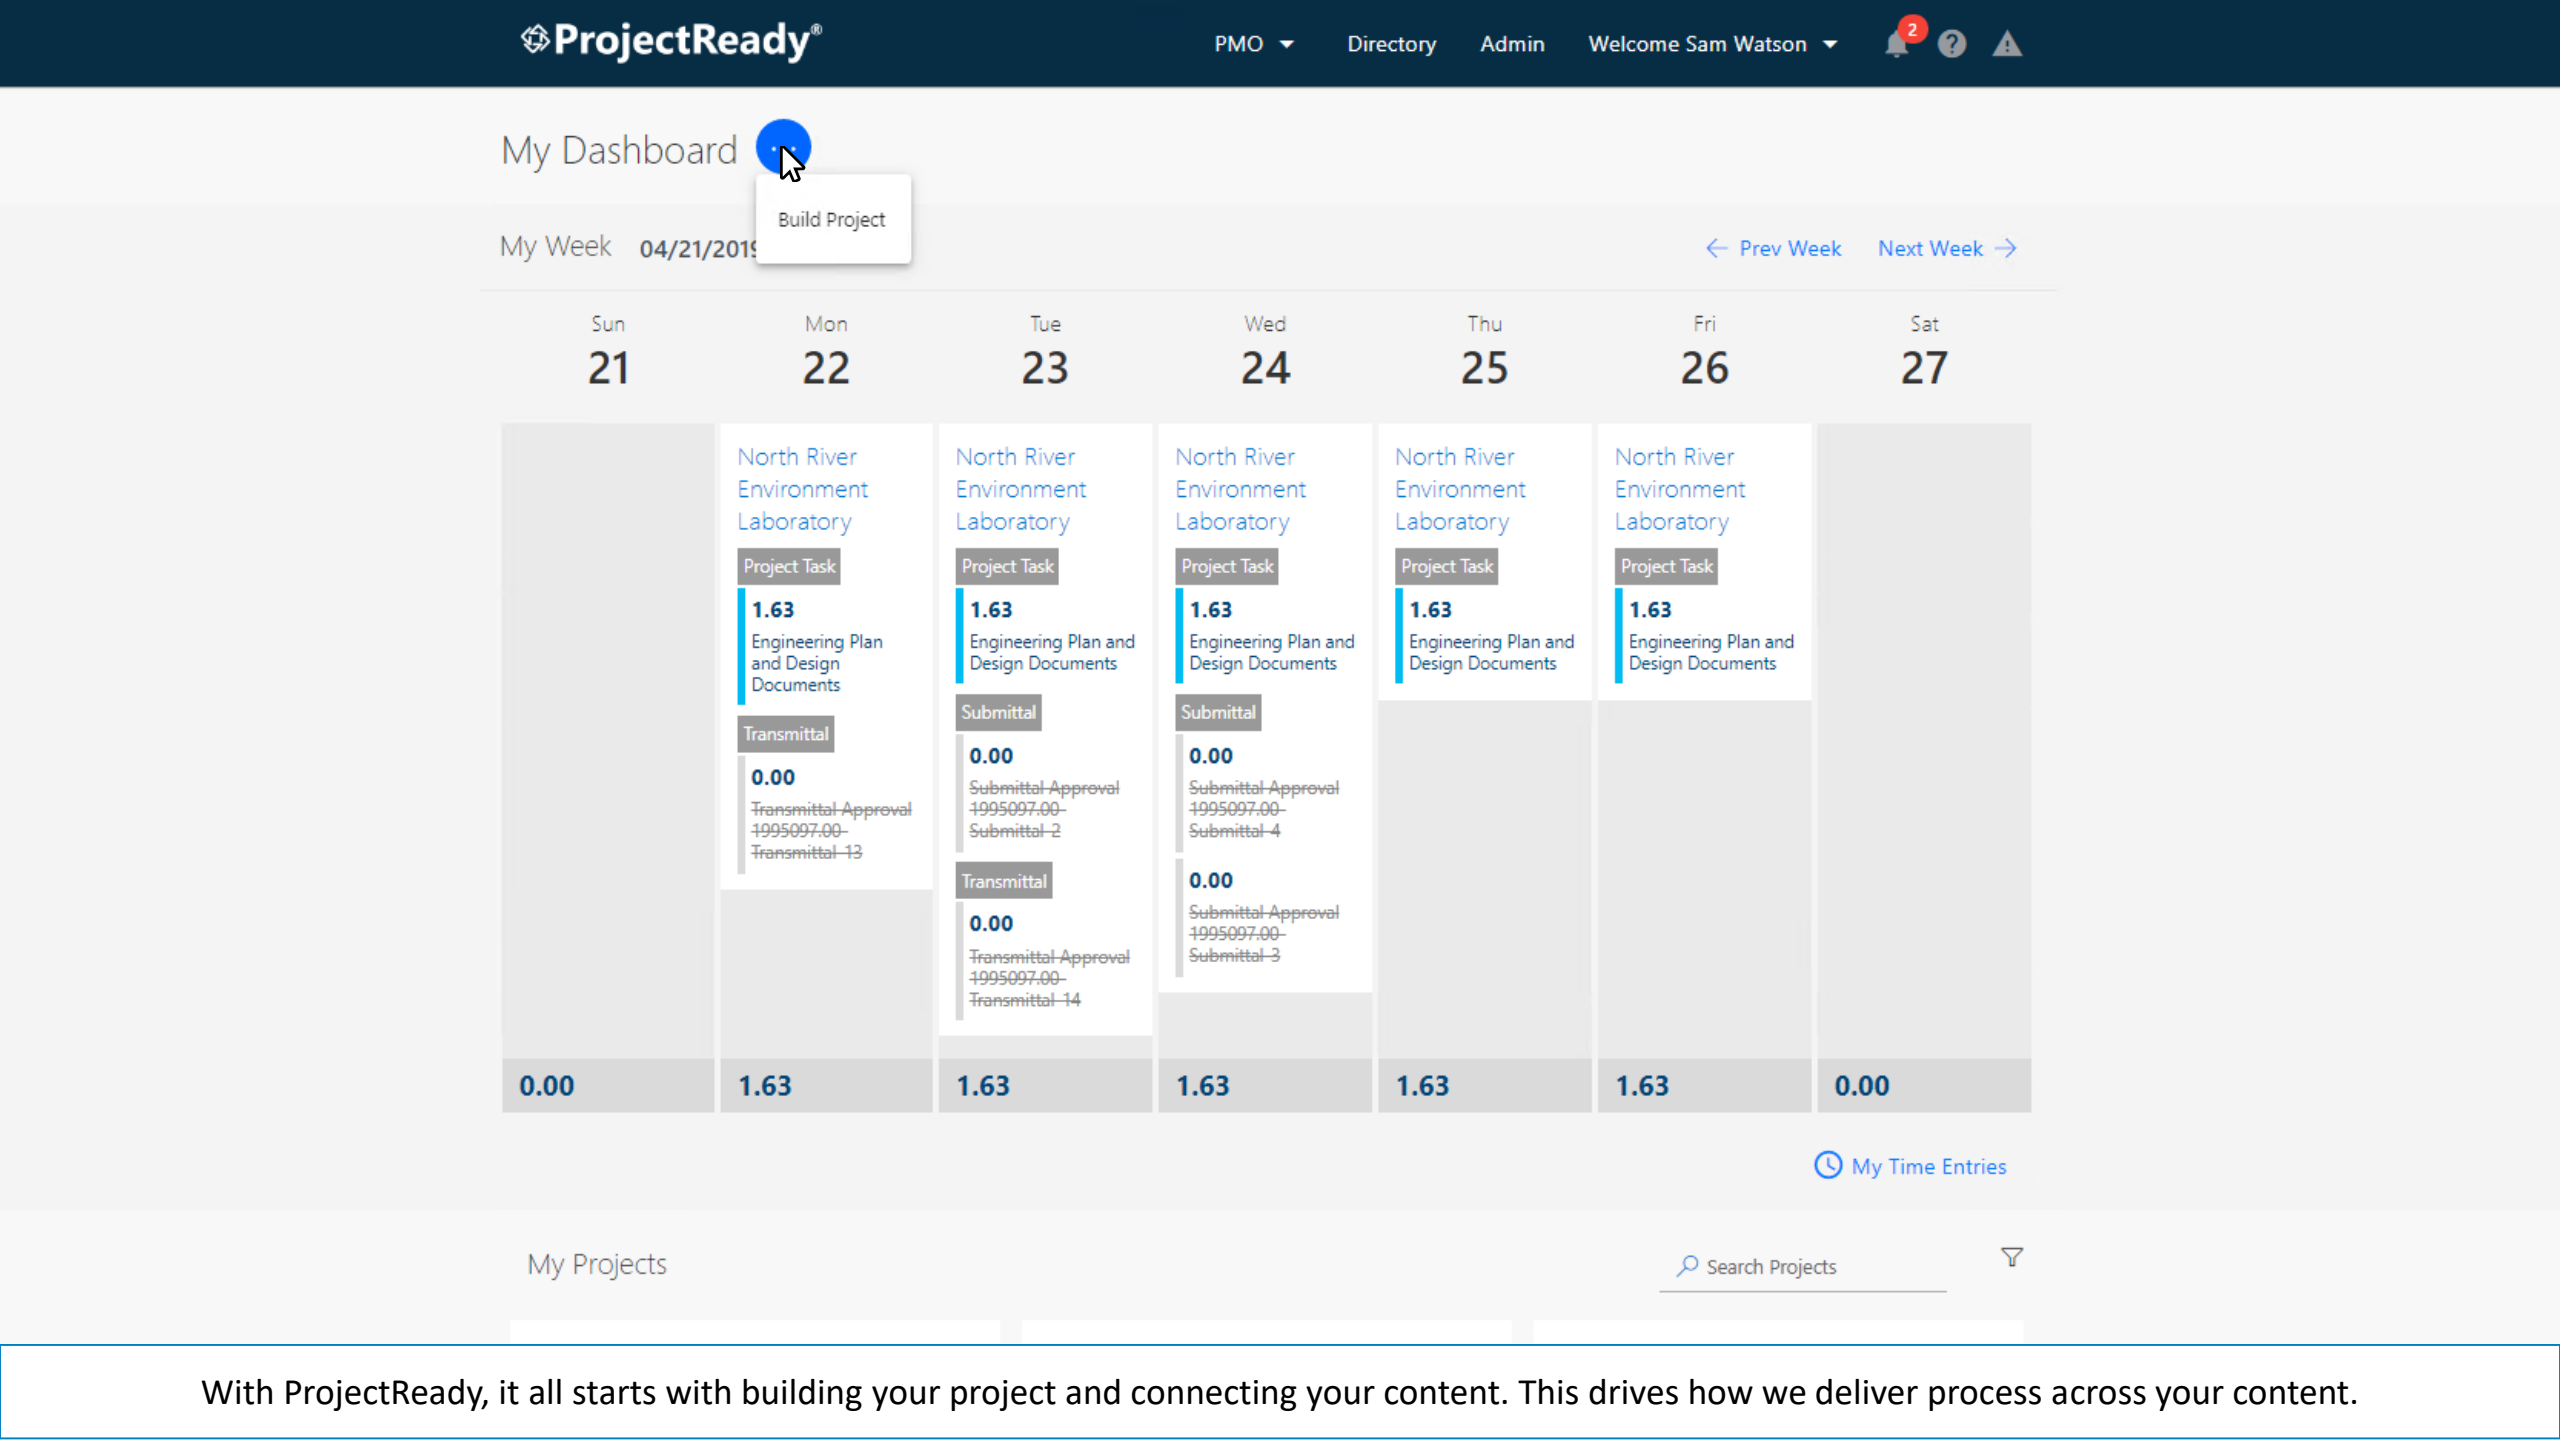
Forecast Revenue & Utilization

Manage Change Orders

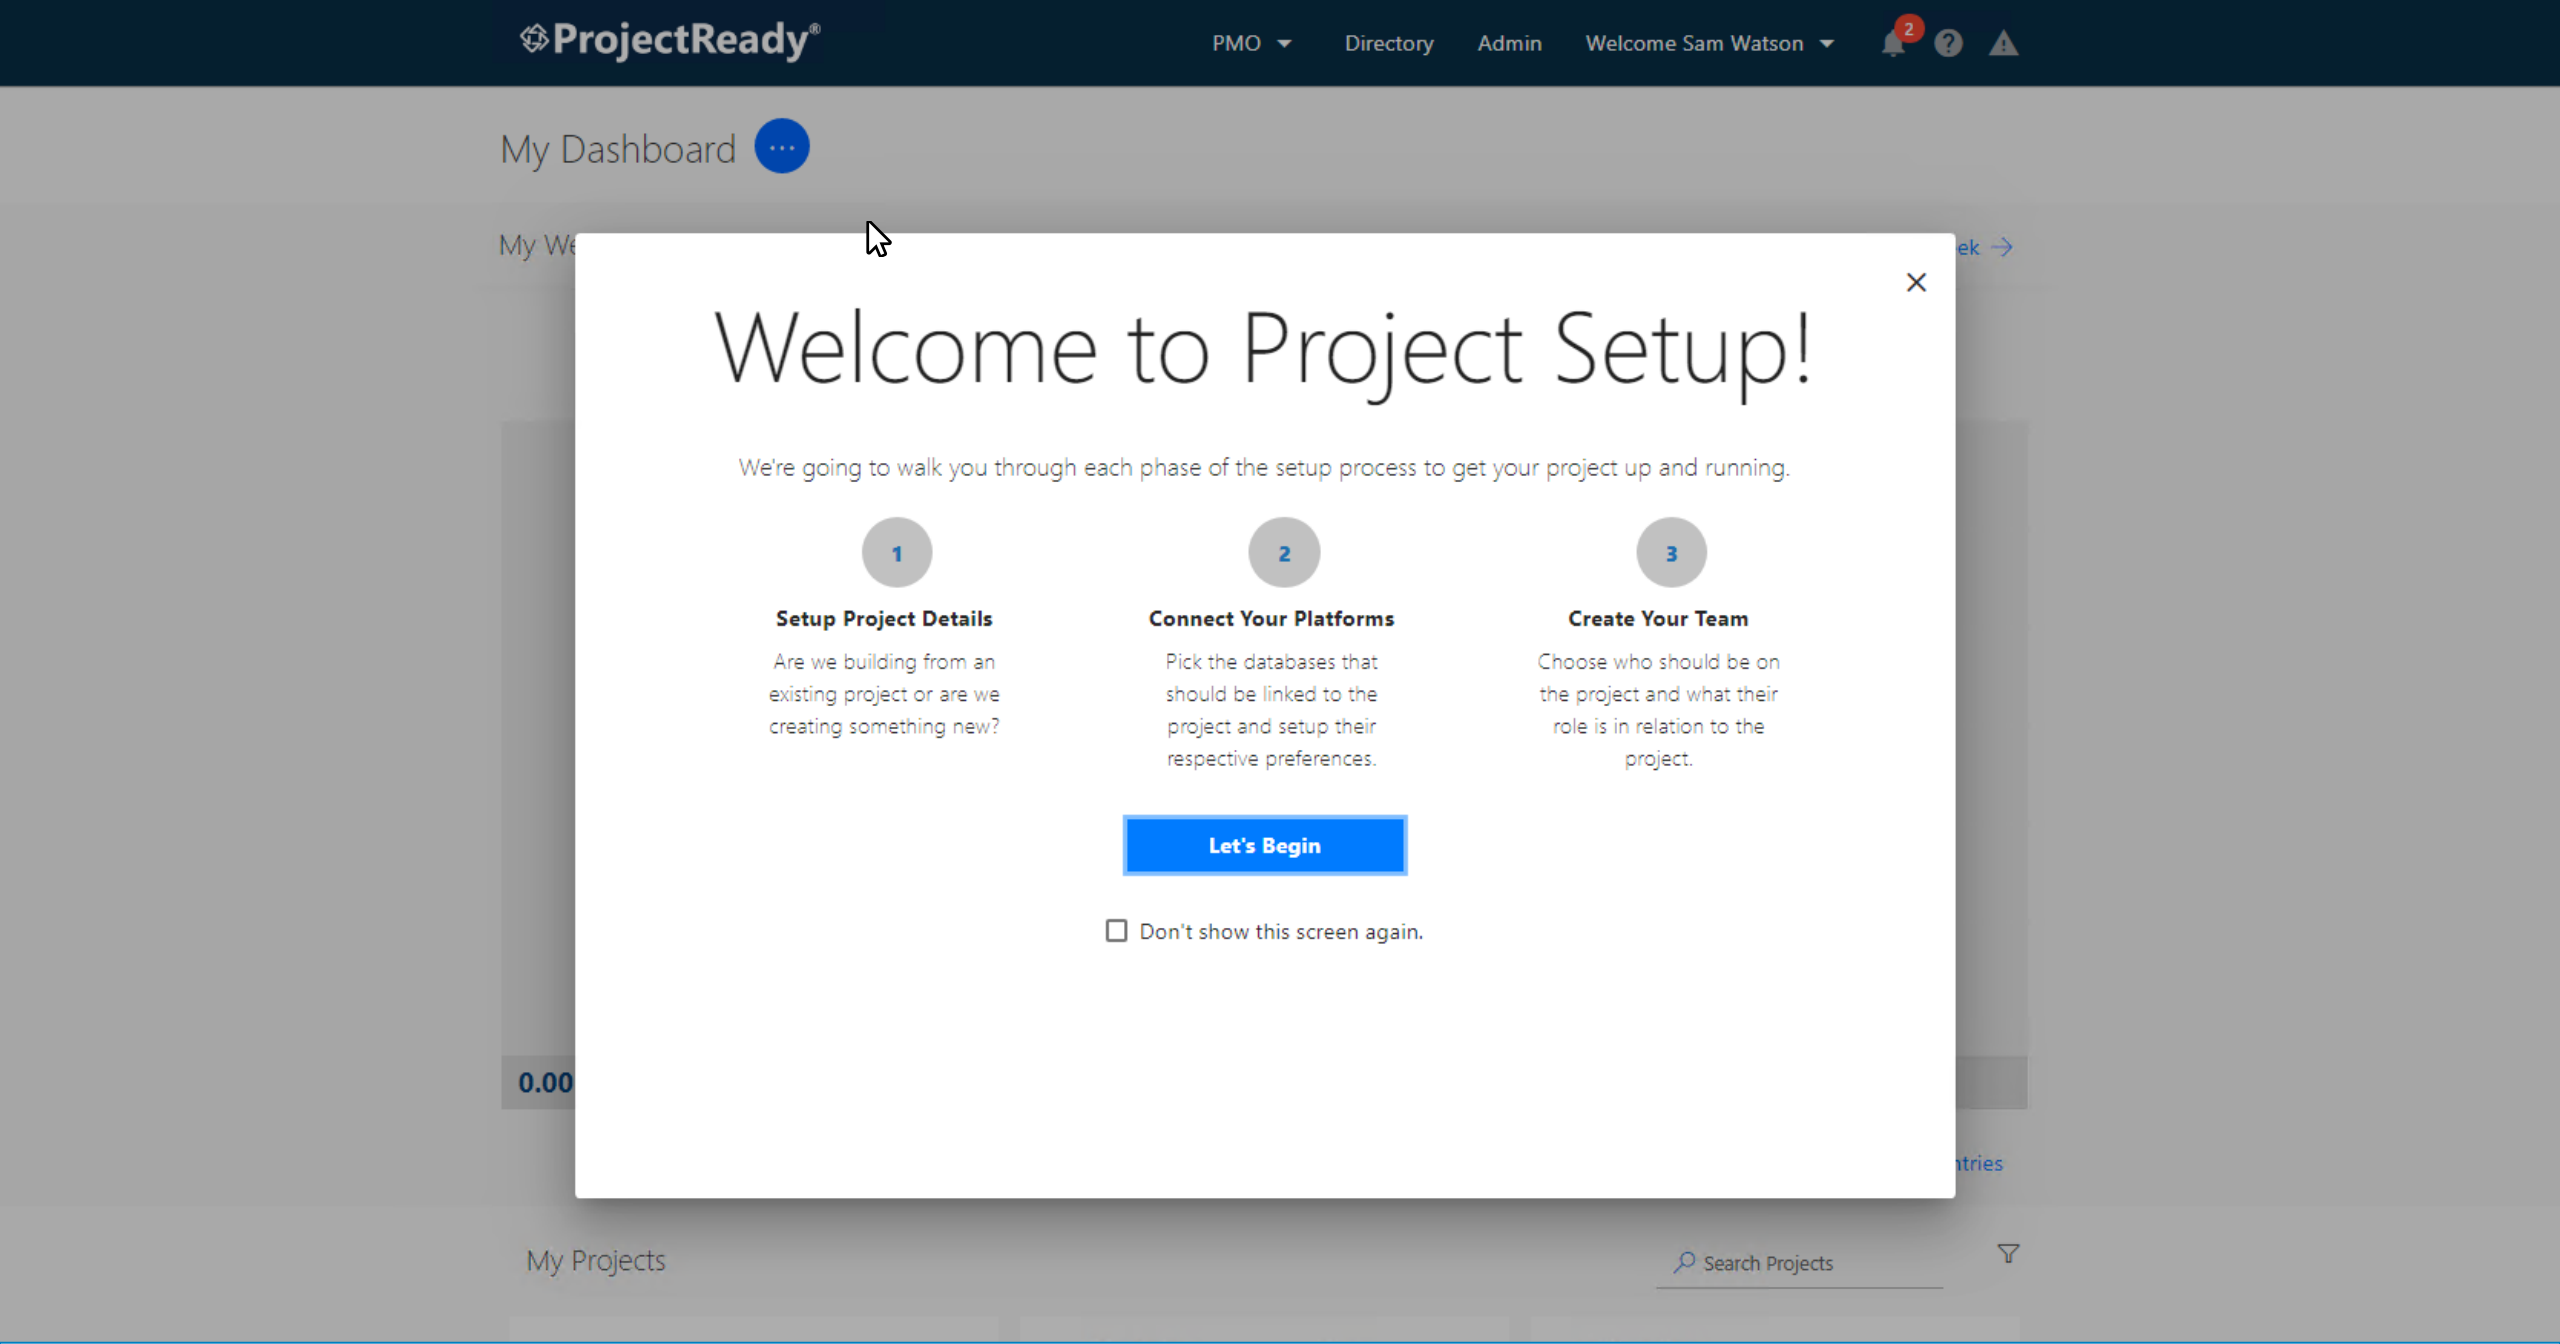
Office 365 | AUTODESK. | box



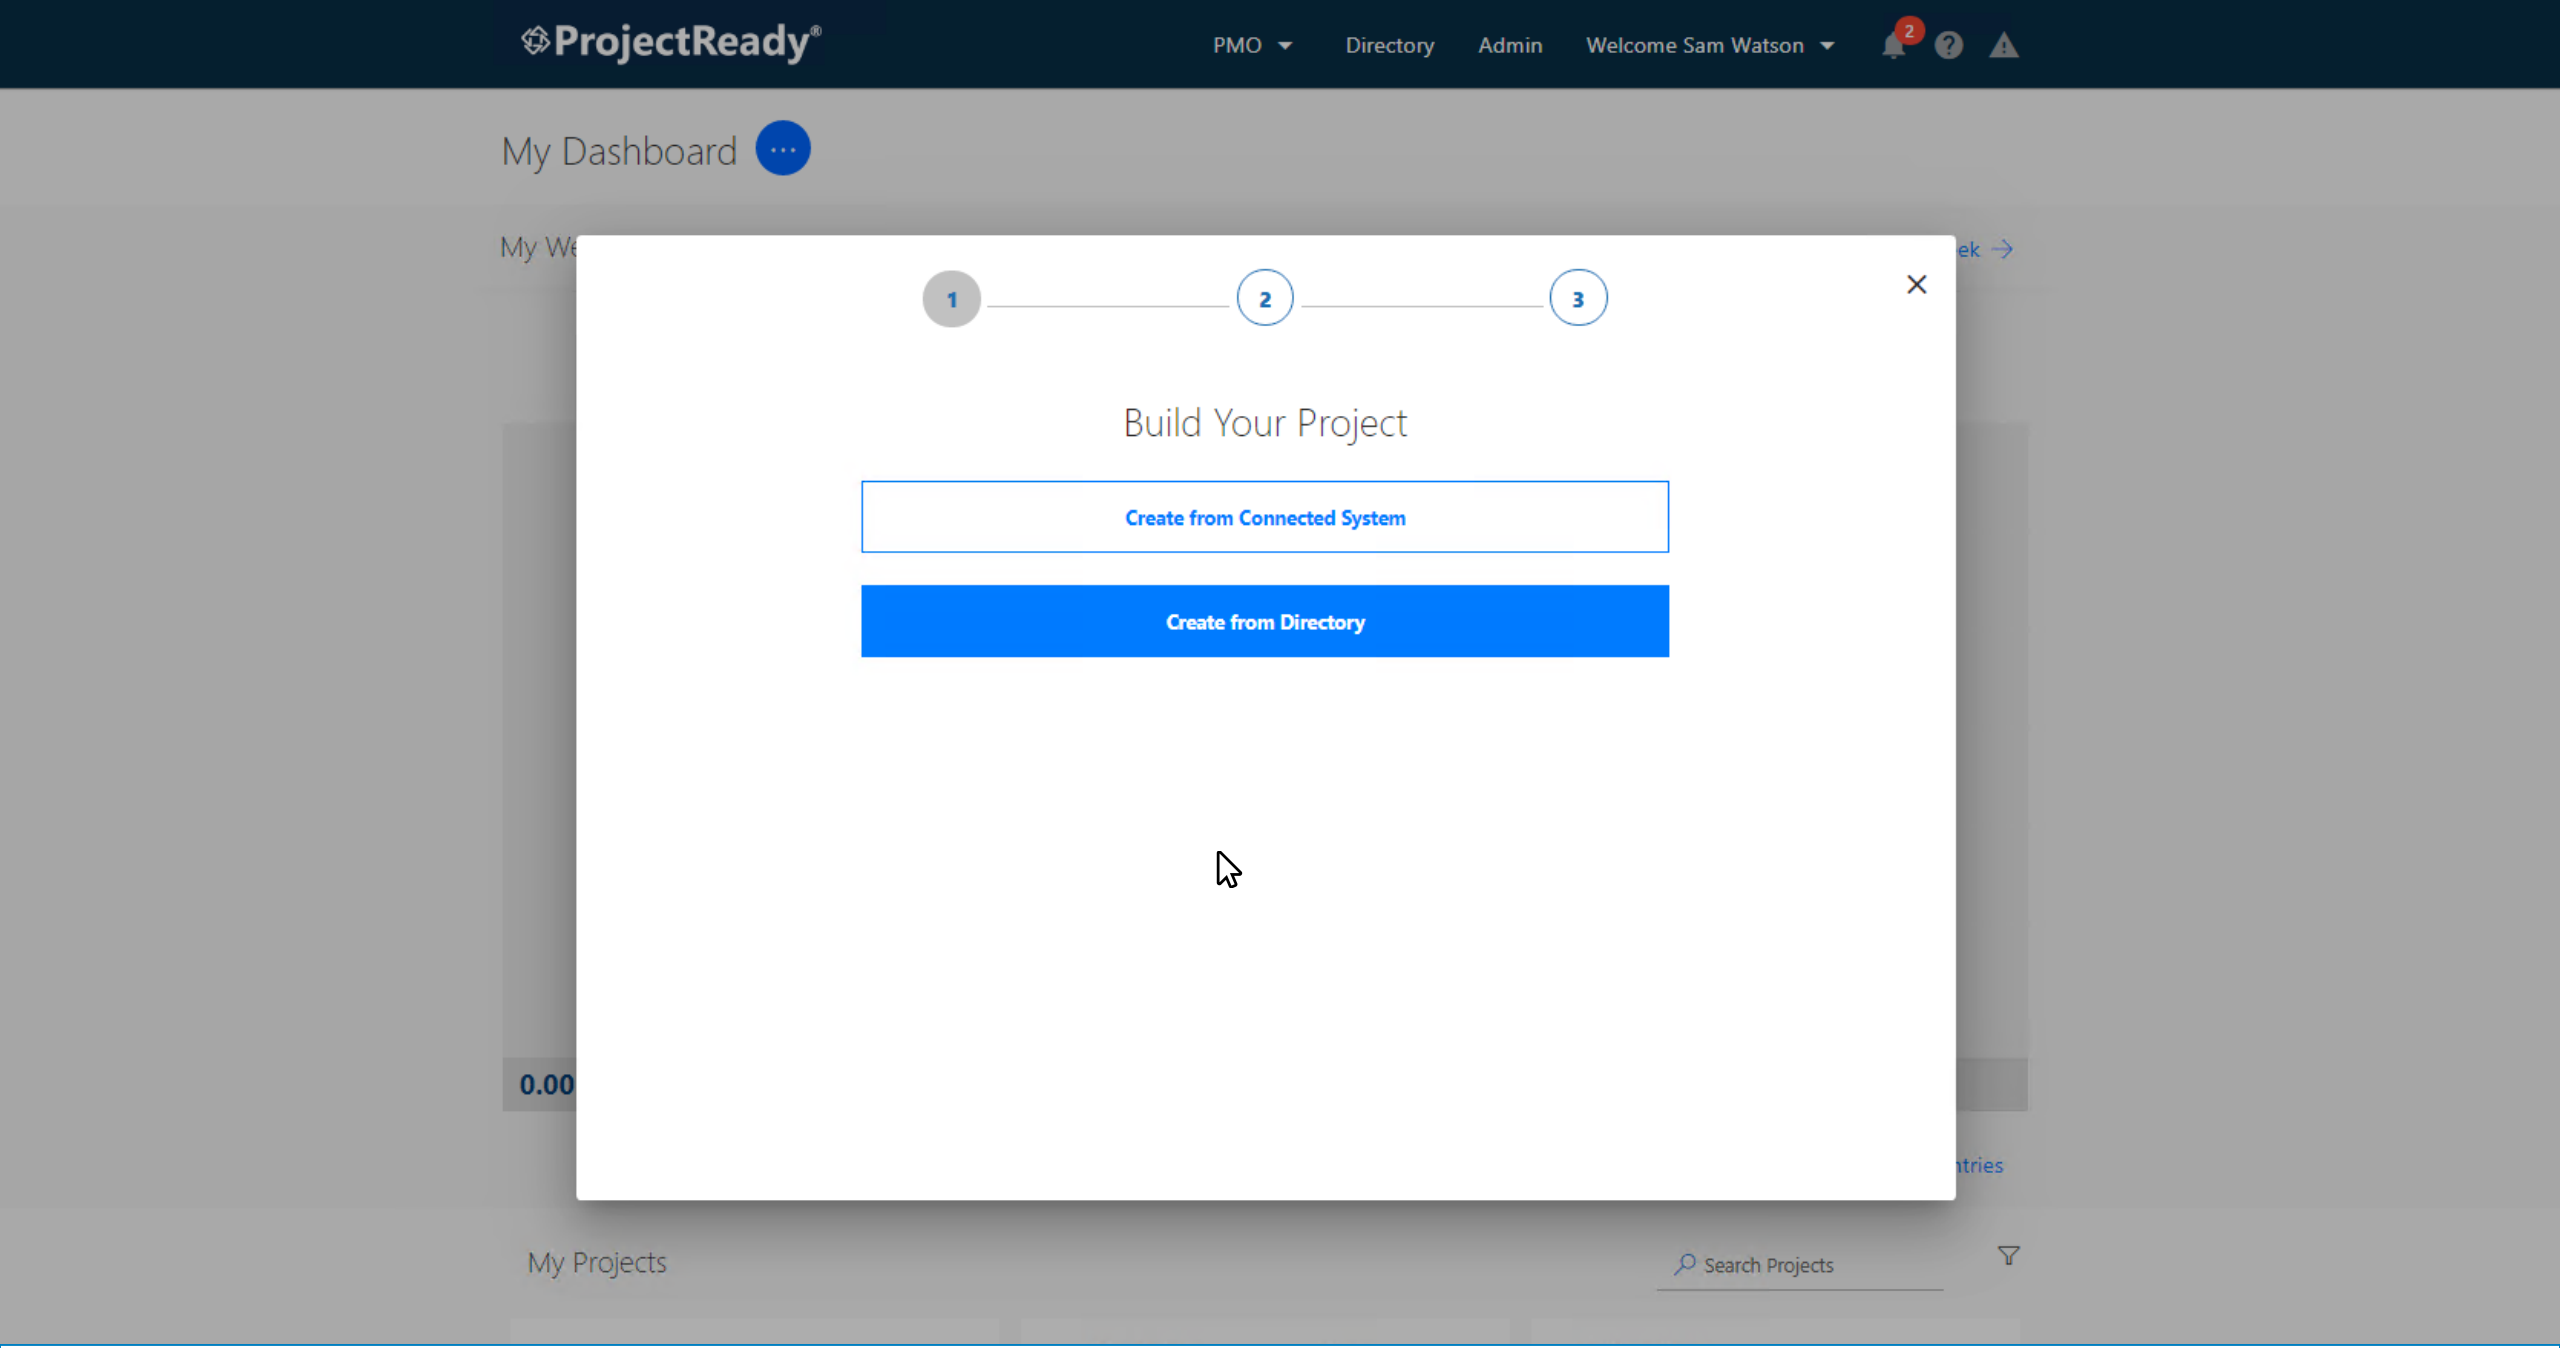
With ProjectReady, it all starts with building your project and connecting your content. This drives how we deliver process across your content.



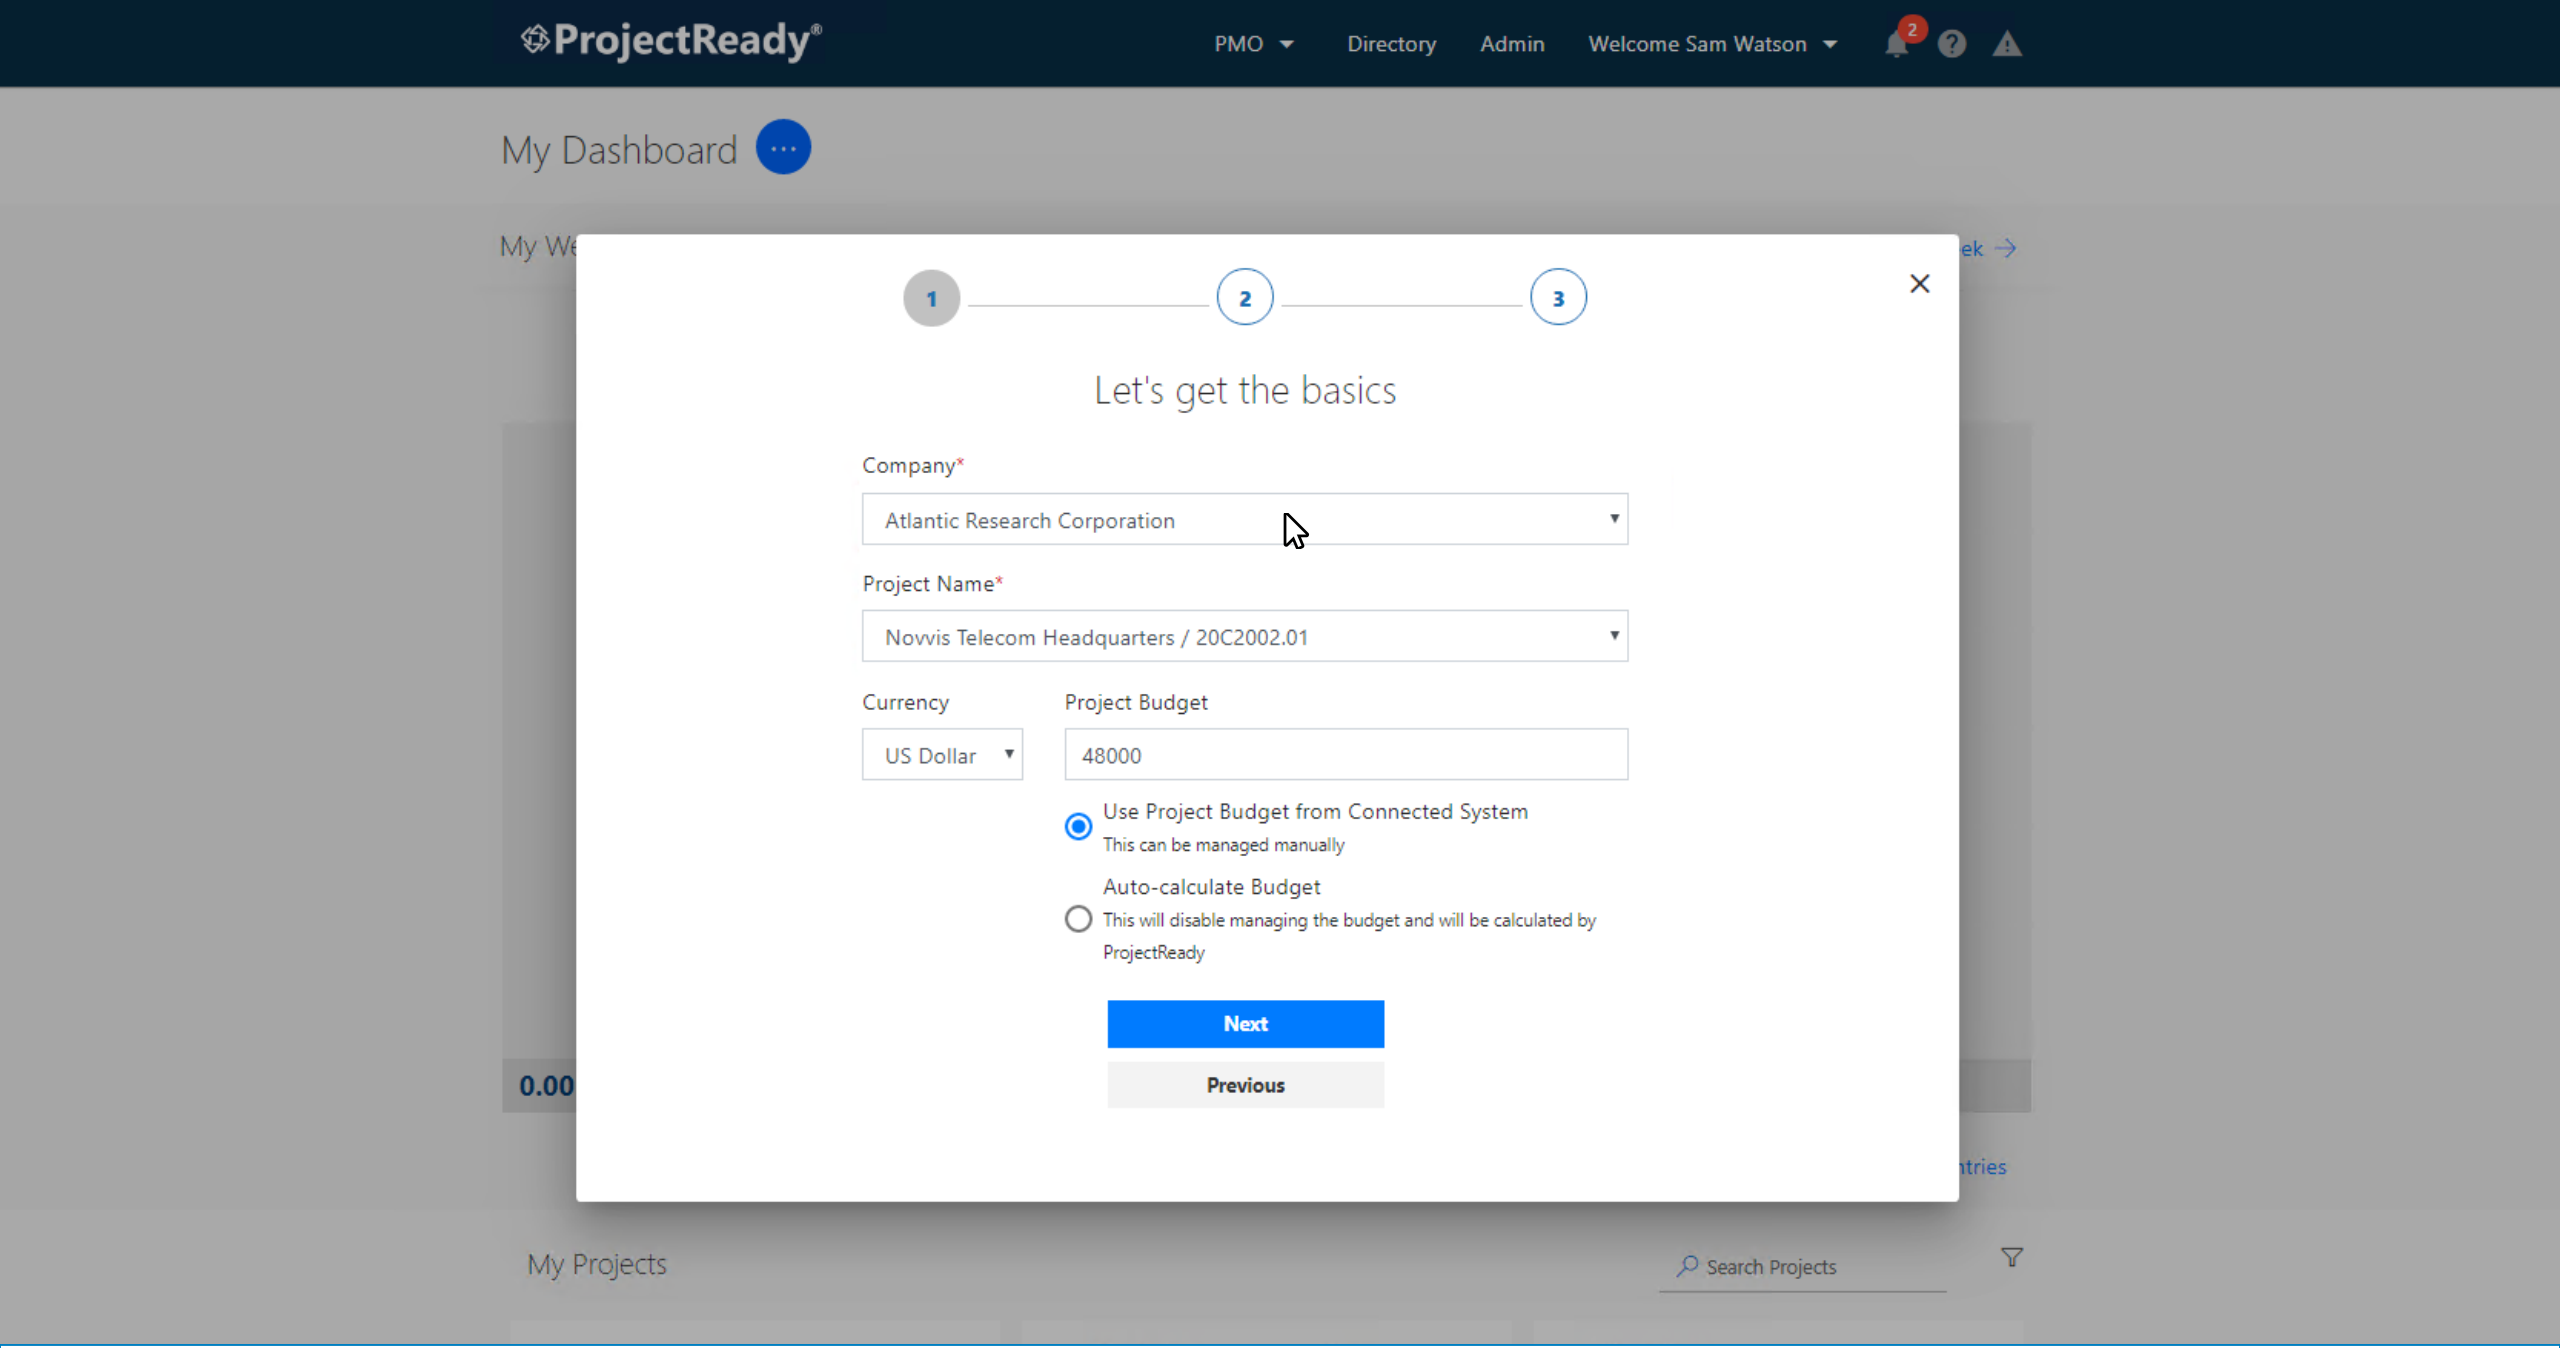
With ProjectReady, it all starts with building your project and connecting your content. This drives how we deliver process across your content.



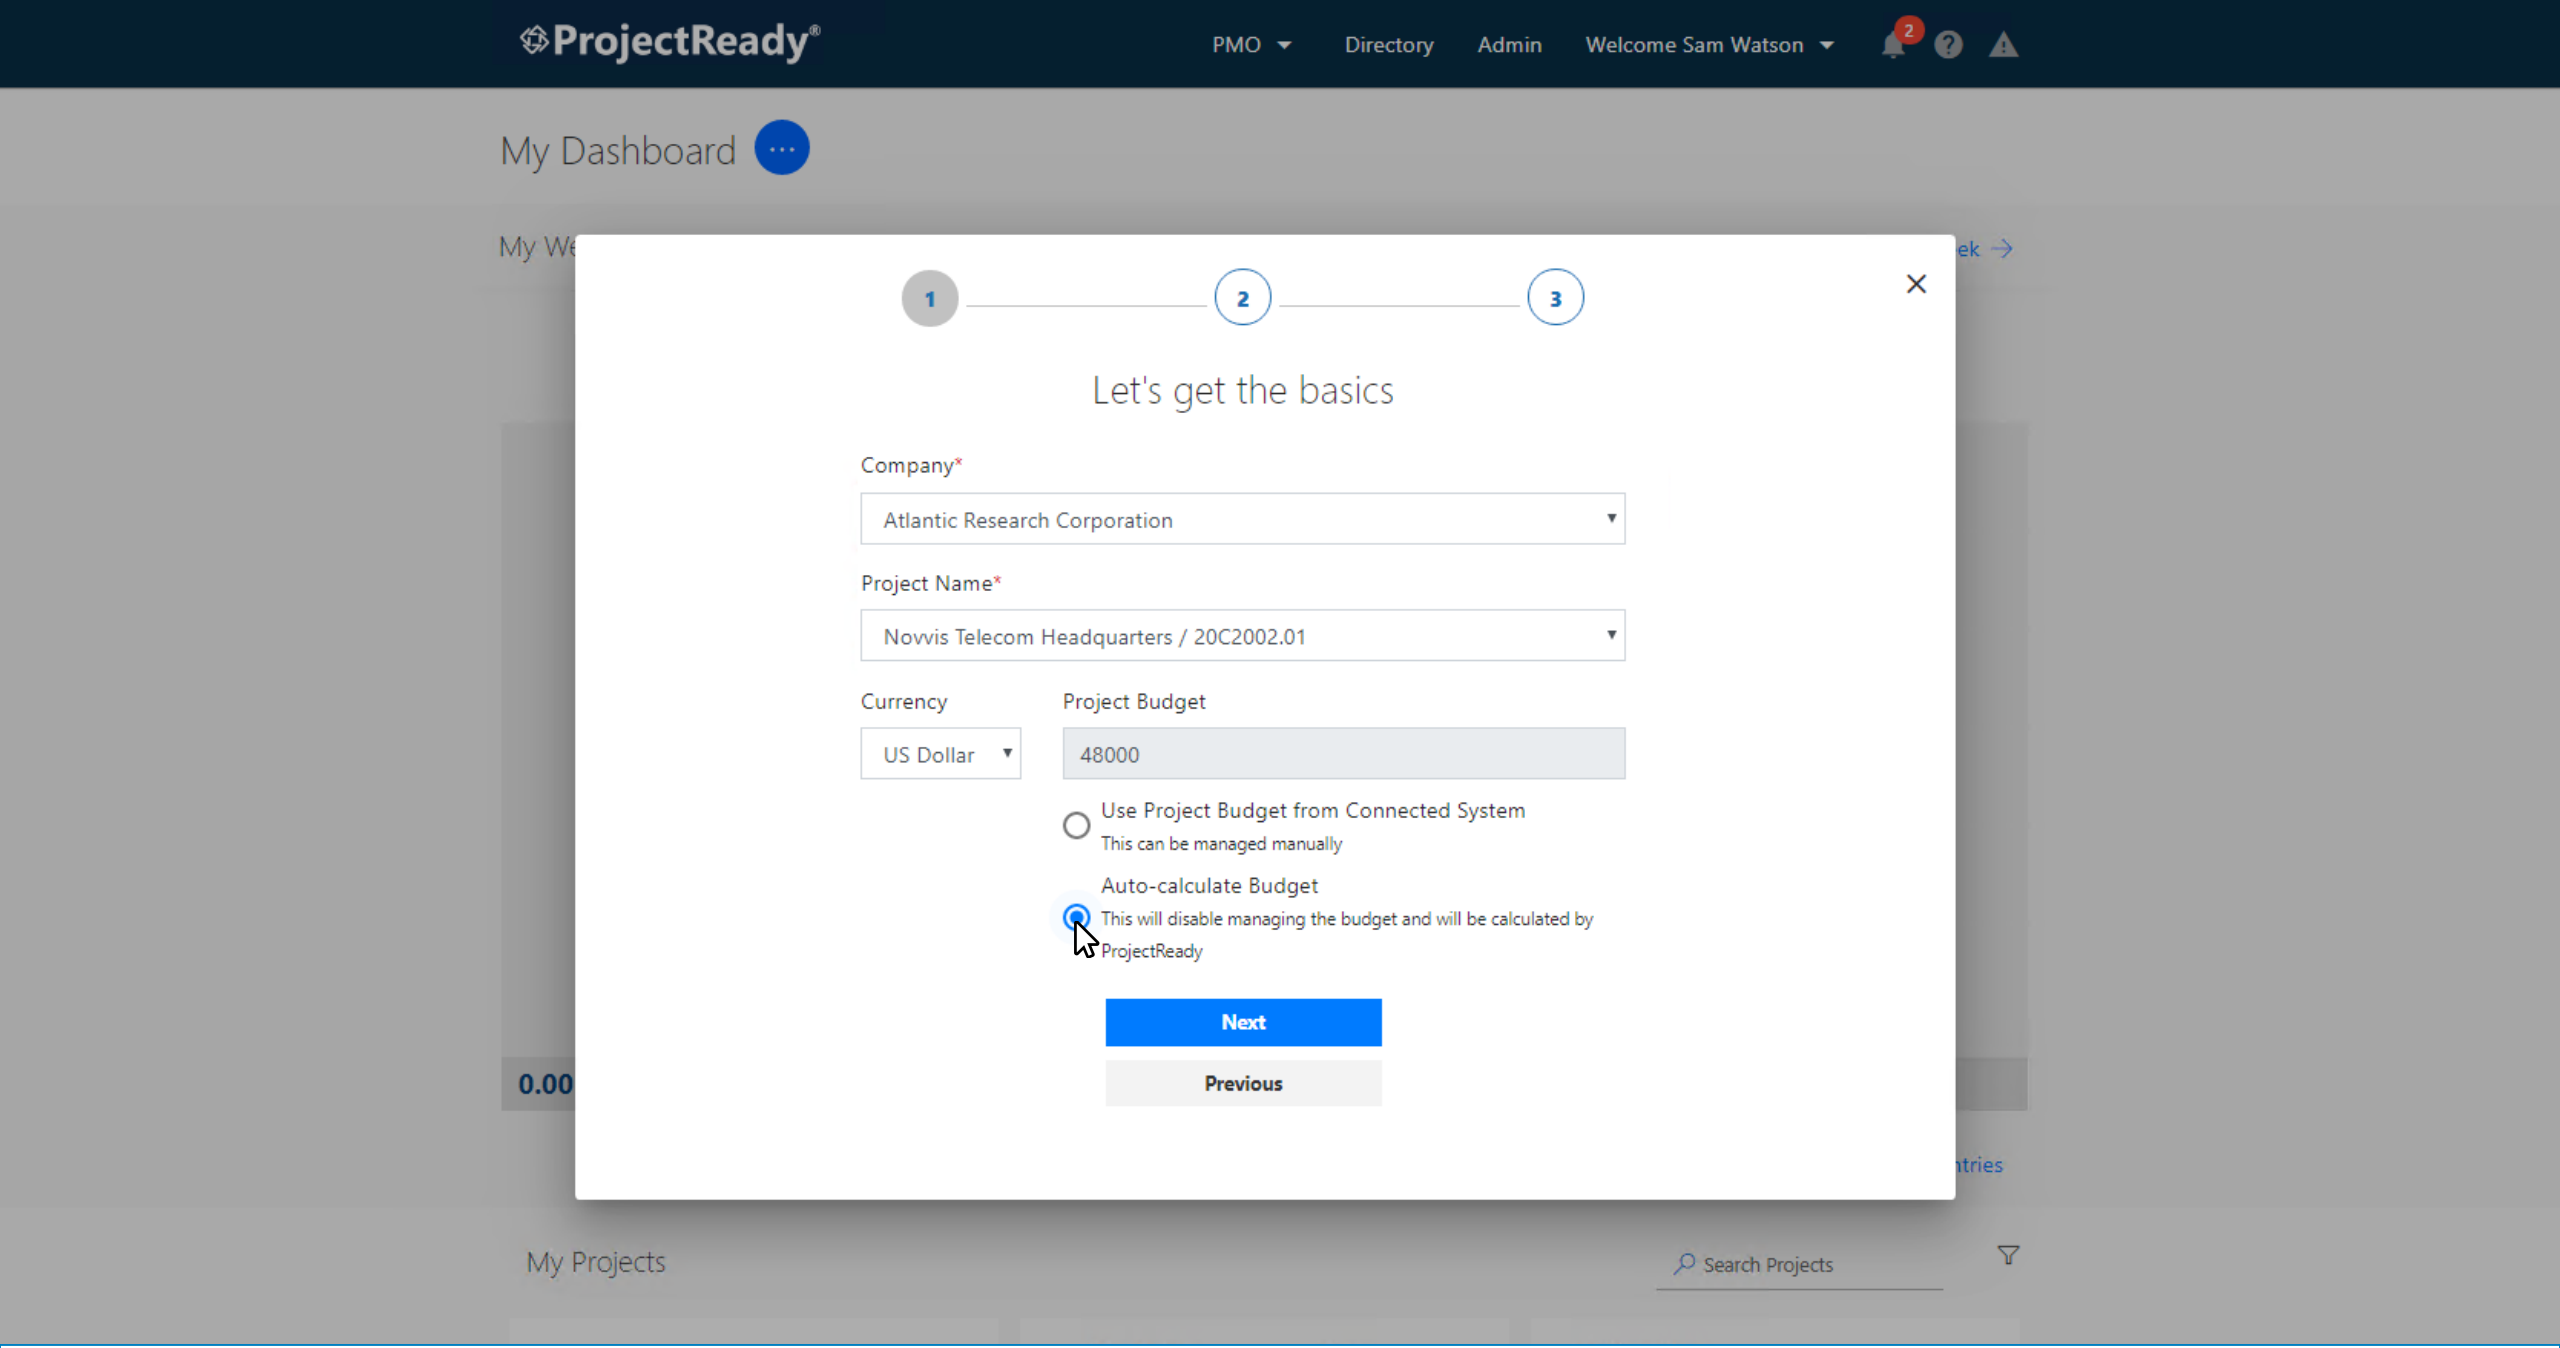
In 3 simple steps, you can connect to other systems and bring together project details,
automate the creation of the platforms where your team needs to create, work and collaborate on content



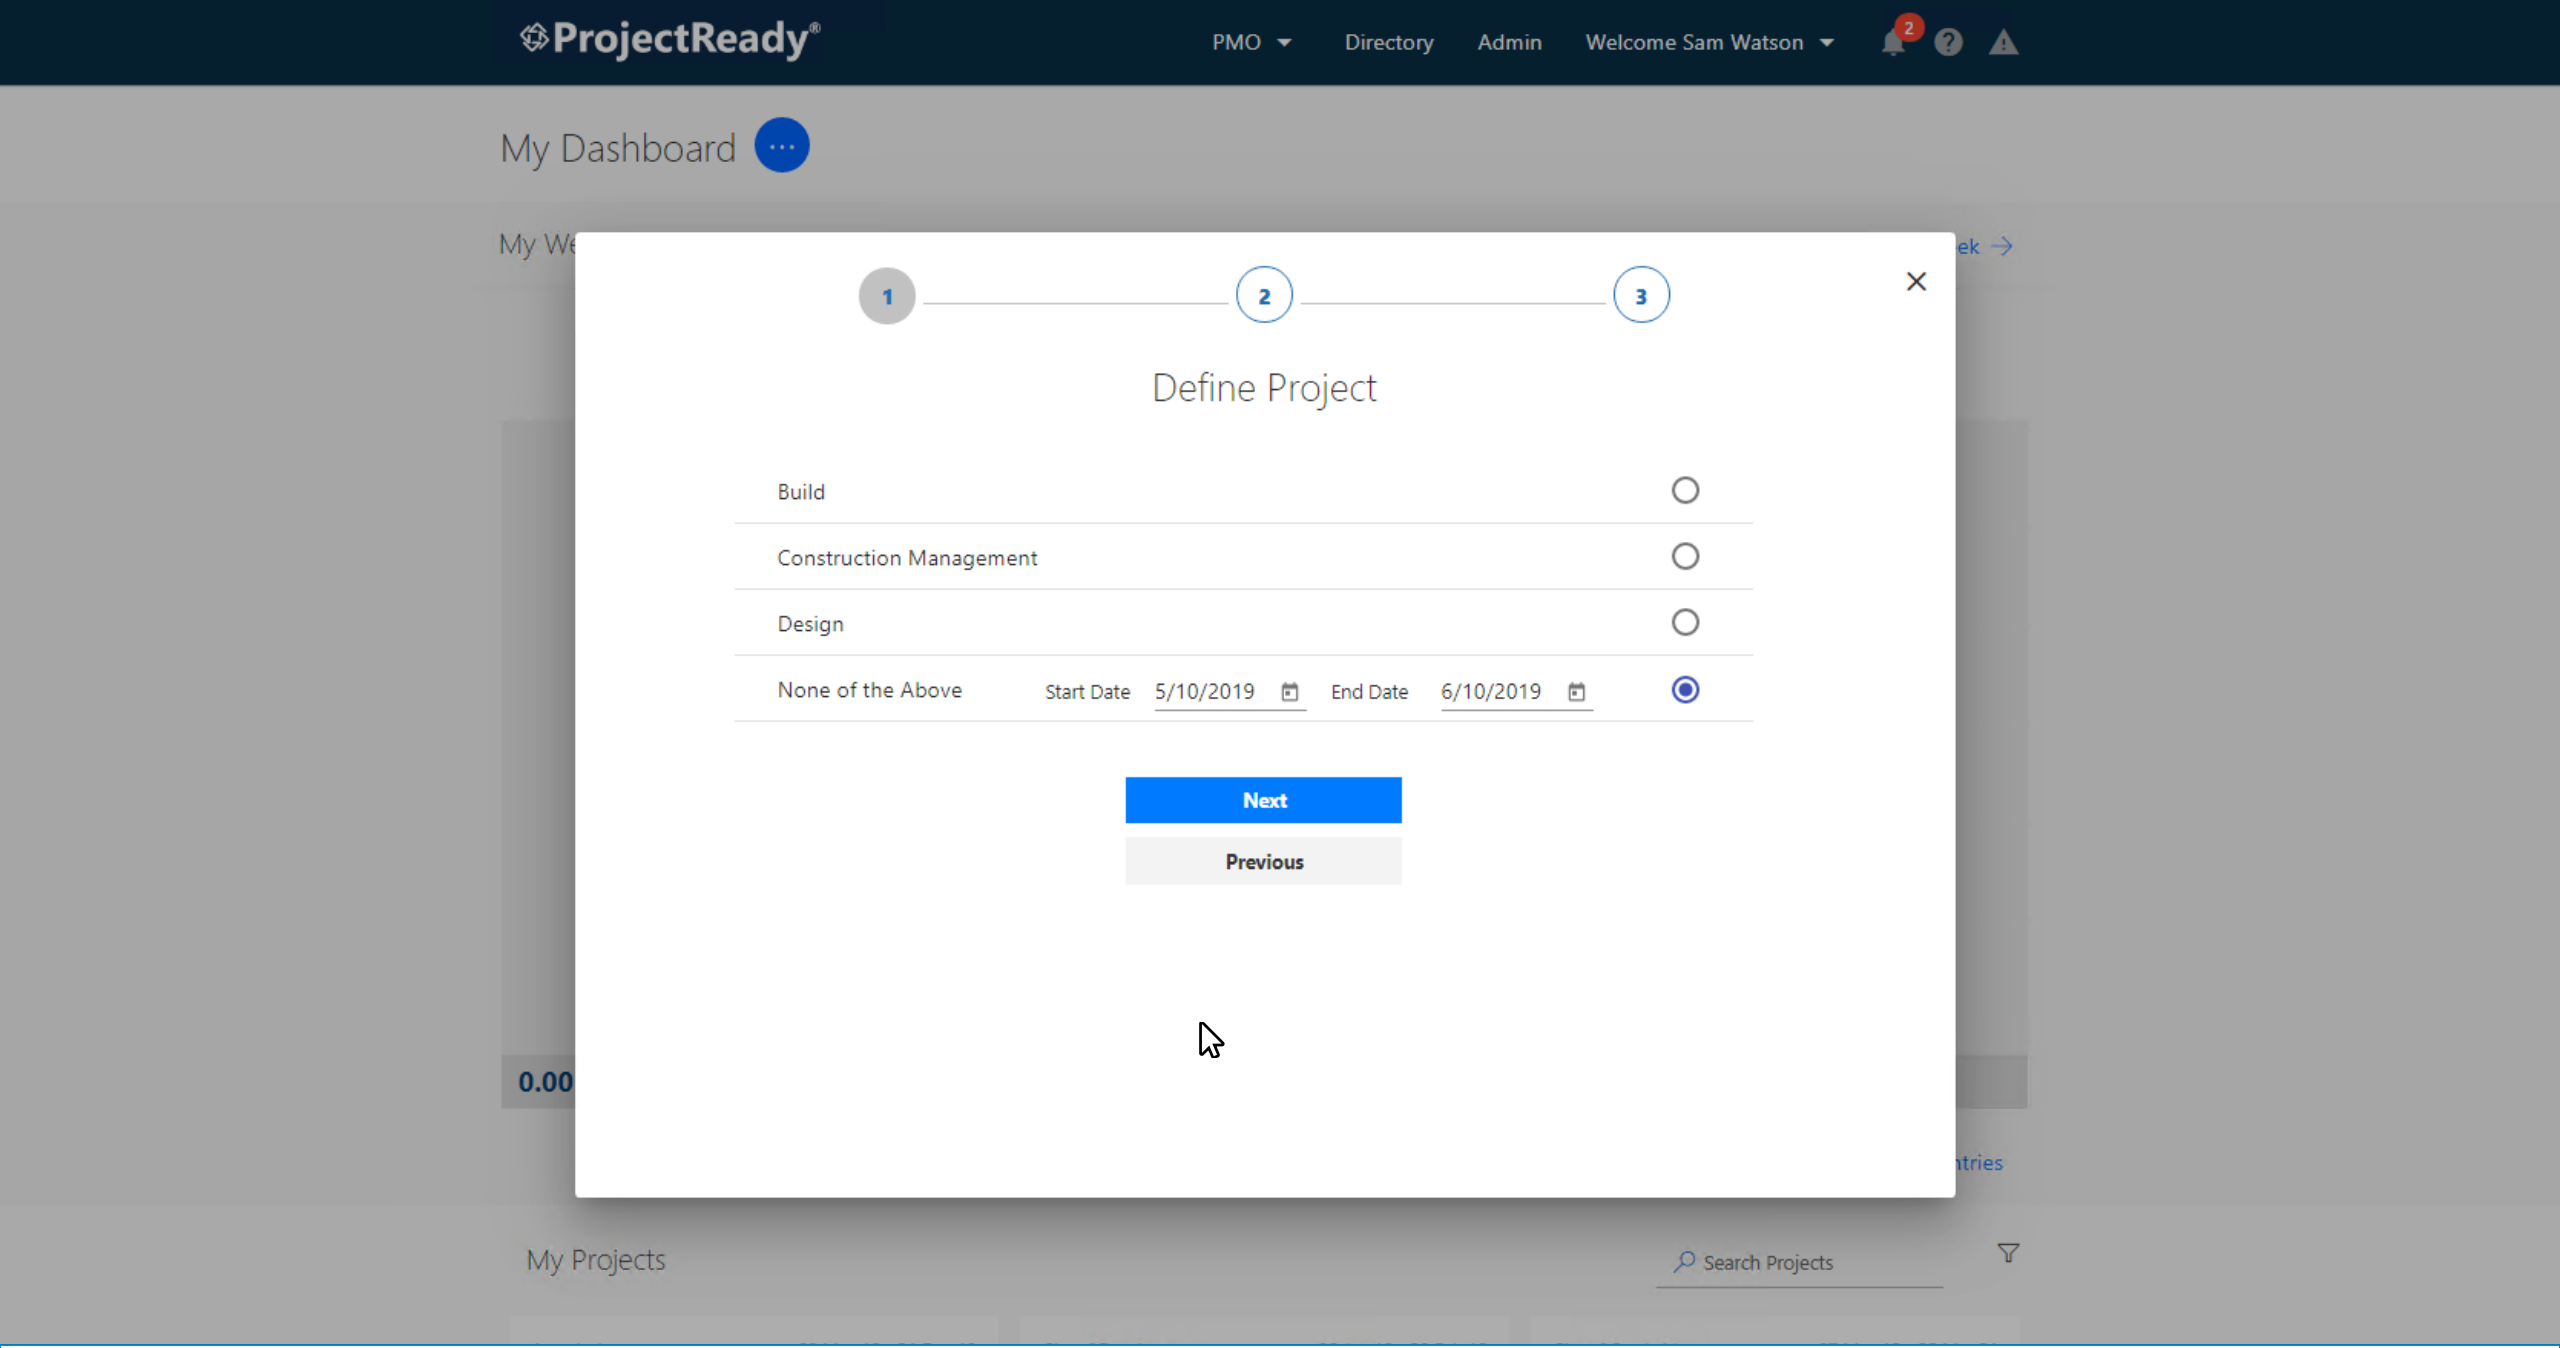
When you build your project, you have a choice of, use your project budget from connected system or auto calculate.



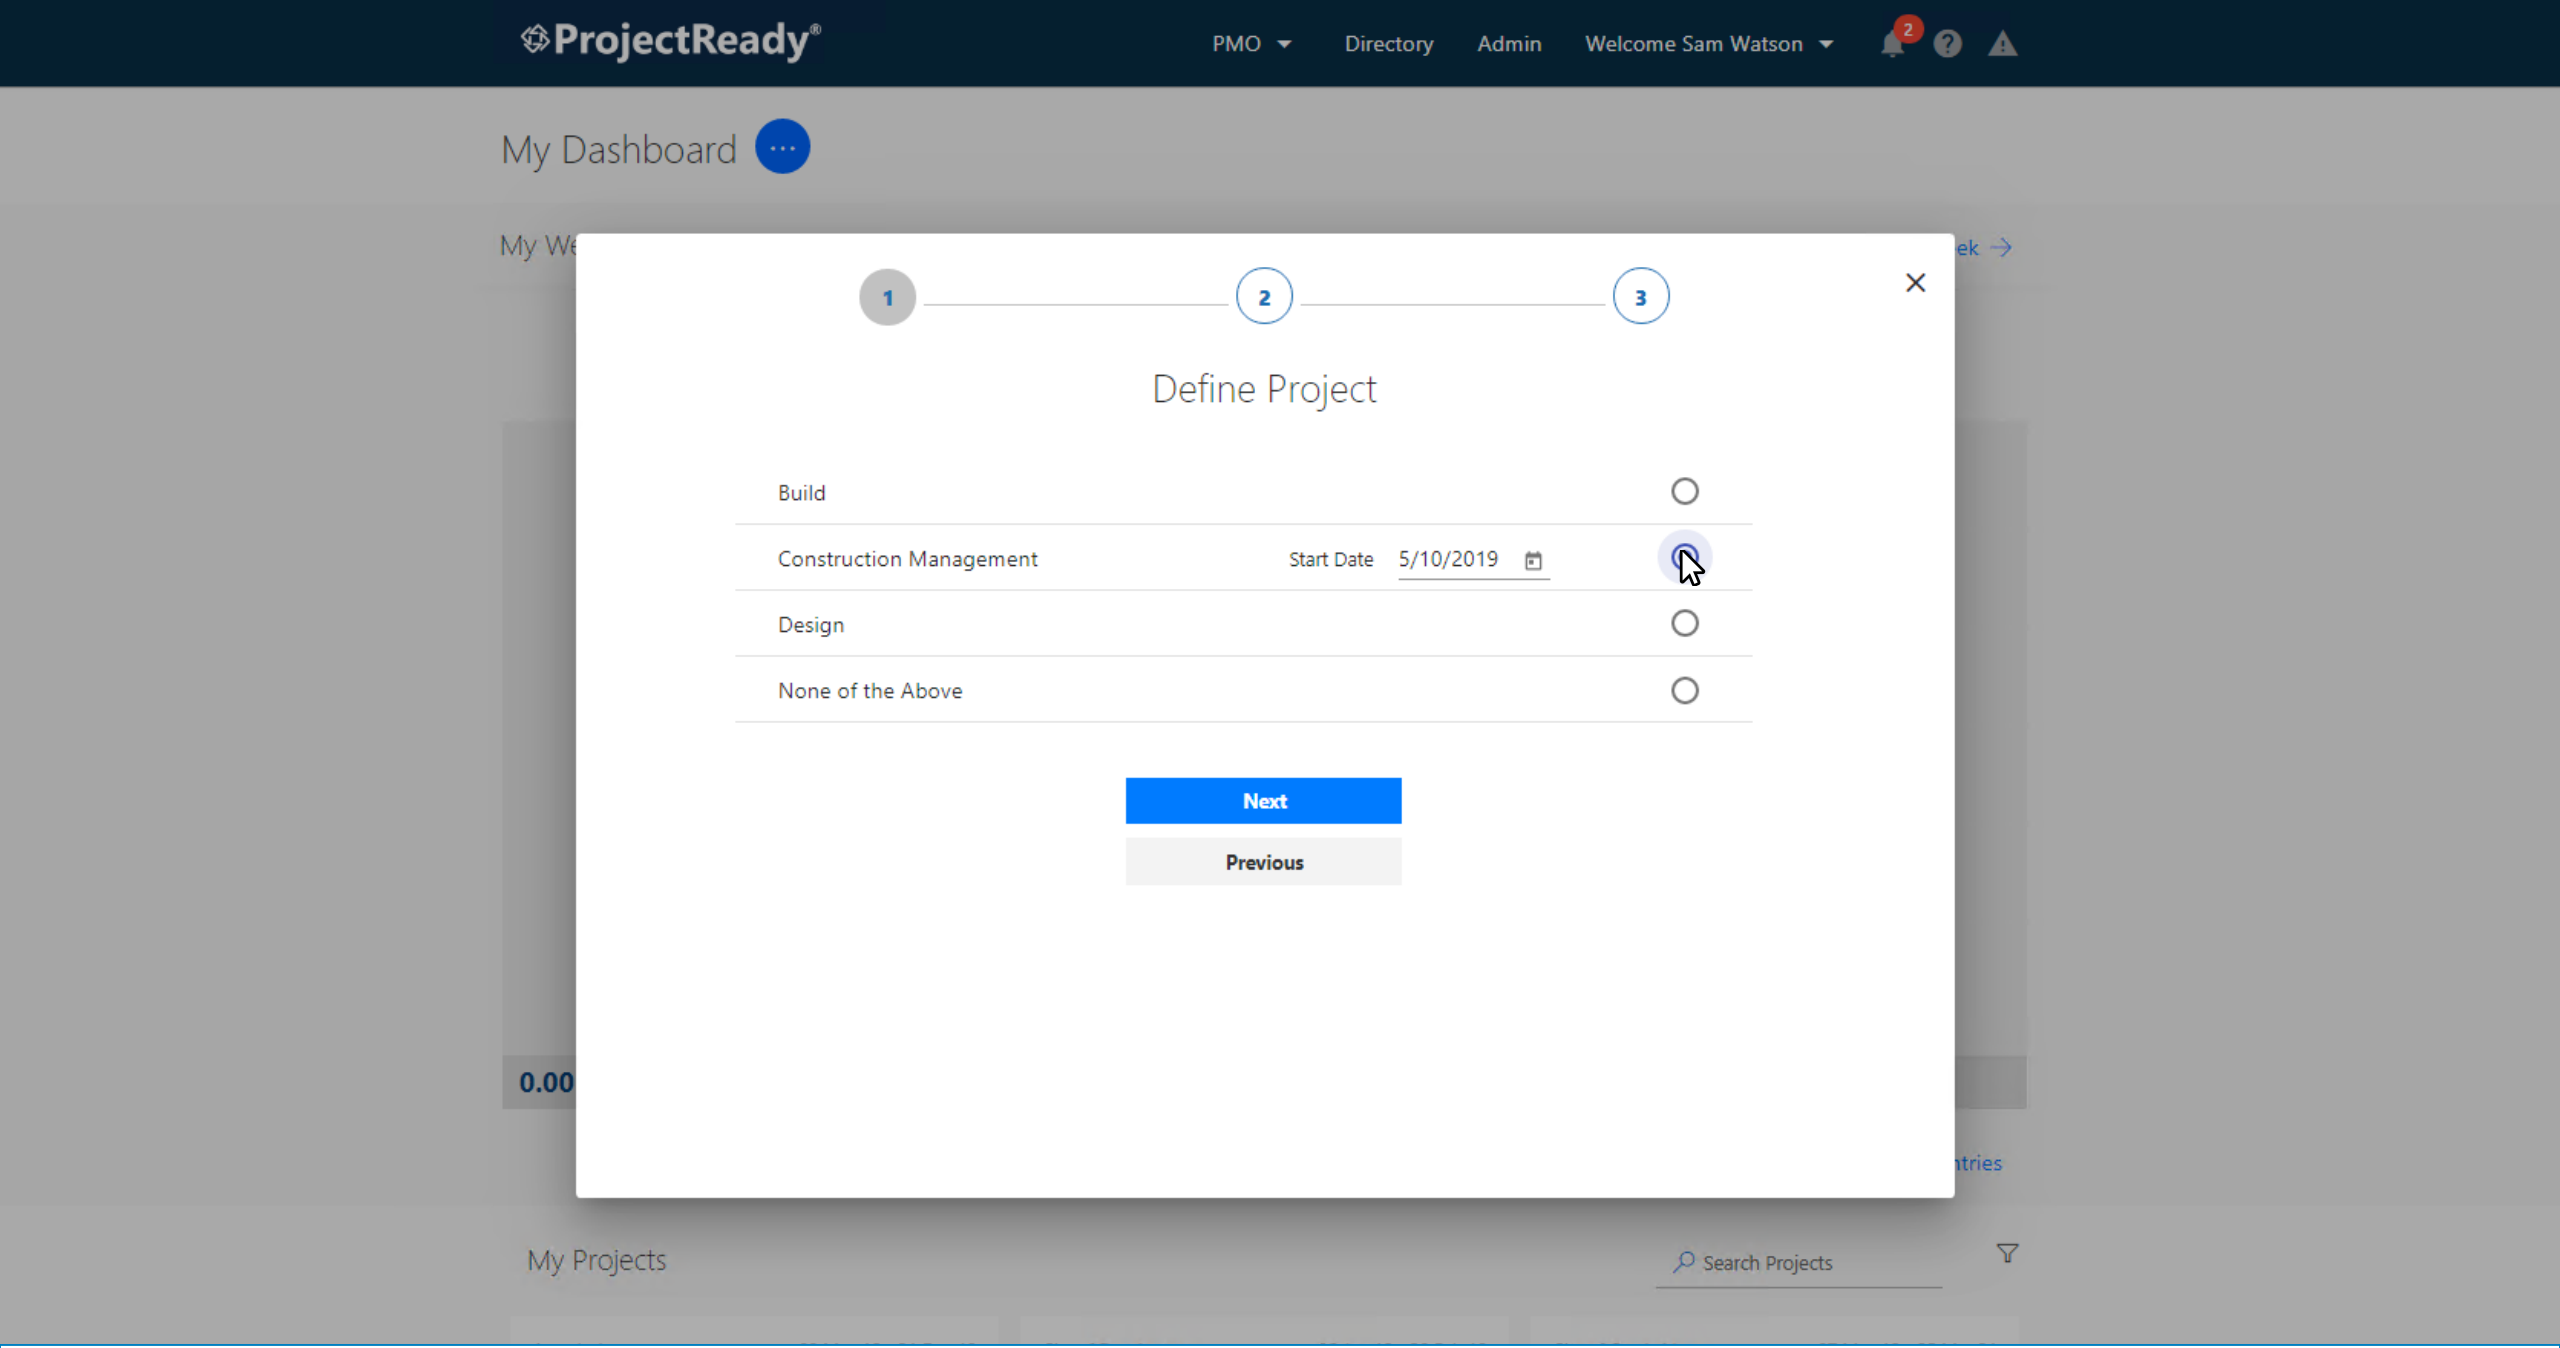
In build your project, when using the project control module, you can auto-calculate your budget instead of selecting it from the system.



In build your project, when using the project control module, you can auto-calculate your budget instead of selecting it from the system.



This is done by selecting one of the pre-built project templates that you manage in the PMO area where you can also set the start date.



This is done by selecting one of the pre-built project templates that you manage in the PMO area where you can also set the start date.
