

# New to WorkBridge Procore-to-Procore RFI and Submittal Sync

ProjectReady's WorkBridge now features an industry first Procore-to-Procore sync, enabling seamless synchronization of RFI and Submittal workflows across multiple Procore companies on a project. This breakthrough ensures that all your workflow's content, comments, responses, and approvals is consistent and up-to-date, no matter how many Procore companies are involved.

## Key Benefits

### Sync Across Procore Companies:

Effortlessly synchronize RFI and Submittal workflows, keeping all your projects Procore companies aligned with the same information.

### Eliminate Manual Effort

Reduce errors and save time with automated updates across systems, eliminating the need for redundant data entry.

### Consistent Information for All

Ensure that every team member has access to the most current data, regardless of their Procore company.

## Coming Q4 2024

### Autodesk Construction Cloud to Procore Submittals Sync

We're excited to announce that soon, you'll be able to sync Submittal workflows between Autodesk Construction Cloud and Procore. This first-of-its-kind feature will extend our seamless collaboration capabilities, bridging two leading platforms and enhancing your project information management.

## See What WorkBridge Can Do For Your Projects

Contact us for a demonstration and start experiencing the benefits today and stay tuned for our upcoming cross-platform Submittal sync from ACC to Procore.
